tions and forms new compounds which

are more soluble, and are thereby made

available nourishment. This result of

which is converted into plant food. Under certain circumstances the use of lime may be detrimental. When brought into contact with ammoniated fertilizers it decomposes hydrochlorate of ammonia, setting the ammonia free, and thereby causing a loss of one of the most valuable stimulants of plant growth. It also reduces a superphosphate of lime to a phosphate, thereby rendering it insoluble. Hence, we find superphosphates and ammoniated fertilizers do not act well on recently limed lands. We would not advise, therefore, the composting of lime with stable manure, hen manure, or other fertilizers have, nevertheless, an antidote for this trouble which should always be resortthis cause. Plaster (sulphate of lime) doing?

But we derive other beneficial effects the elements needed to increase its from liming. By breaking up these combinations in the soil it renders it more friable and easier penetrated by the atmosphere and warmed, and in this condition it absorbs the moisture more readily, and is less liable to suffer small quantity of lime is requisite, independent of its action upon and in conjunction with other constituents in the land destitute of humus or vegetable matter makes available the inert properties in the soil, acting as a stimulant to the crop, and leaves the land in a depleted condition. Third—That only as may be supplied, can its full benefit

with clover as the best means of furnishing the requisites of a complete fertilizer. Of all plants none seem more dependent on lime than clover; and it will not grow on land destitute of lime We find by analyzing ash of clover that of its inorganic or earthy parts there is twenty-five per cent of lime, twenty-seven of potash and soda, lime, twenty-seven of chlorine, first control to feed the second crop in the control to feed the control to feed the control to feed the control to feed the second crop in the control to feed the control of silica, twenty-five of carbor, are the barn, where the manure can be betsix of phosphoric acid, and three per no danger of the cattle feeding too Thus we

art of clover. The carbonic acid is supplied by the atmosphere in abundance. From the peculiar habit of the clover plant, it draws its nourishment can get it cut before we have any from sources not available to other plants. Its fibrous and deep penetrating roots search for food to a depth not attainable by other plants, while its up sufficient to protect the roots through numerous and broad leaves drink in its organic constituents from the atmosphere, shading the ground from the decomposing rays of the sun, and concentrating near the surface a mass of those very elements needed for the succeed-

We thus have in the combination of these two fertilizers—the mineral and ed and new theories thereby evoked. the vegetable-those very constituents requisite to the nourishment of the cereal crops, and to this end an all-wise Creator has so abundantly provided lime that it is supposed to comprise one-seventh of the crust of the earth. It remains for the tiller of the soil to utilize these resources so bountifully

VALUE OF SUNFLOWERS.

We would call the attention of farmers at this time to the value of sunflowers as a crop, and enumerate some of their values and uses.

in honey and furnish food for bees .- gathered, is better adapted to the grow-The seeds contain oleaginous matter, ing of onions than anything we ever and will yield oil at the rate of one tried. Although a very powerful magallon to the bushel, which is but little nure, we have dosed our onion beds inferior to olive oil. One acre will produce fifty bushels of seed. It is also best results. When large quantities valuable for feed for horses and poul-try. The leaves are excellent fodder with two or three times its bulk of or cattle.

The stalks while growing may be at planting time.

utilized as bean poles, where they are scarce and difficult to be obtained, and when dry may be used as roofing, or set up against a fence to form a windbreak. They contain a large amount of potash and are excellent for fire kindling. The seed has also been rec-

ommended for fuel. The reputation of the growing sunflower to absorb miasmatic vapors, and flower to absorb miasmatic vapors, and preventing fever and ague, is well and conditions of the soil to which it has been applied, and many fail to real-Industry," of Richmond, Va., writing on the subject of Sunflowers, &c., gives the following as the result of his exper-

iments:

"Contiguous to my residence is a marsh. During the Summer and Fall of 1872 nearly every member of my family were down with the ague and fever. In the Spring of 1873 I thought I would give the sunflower a trial, and planted a number around the yard. I do not know whether there is really any medical virtue in this curious plant, but not a case of chill occurred that season at my house, and I secured a very excellent food for my chickens. Pleased with the experiment, I shall try it more extensively this year and cultivate a patch, assured of this fact, that the seed will compensate for the

trouble. Dr. Pouchet records that the insensible transpiration of the sunflower is seventeen times as great as our own. Hales ascertained, by daily weighing it in scales, that it lost, by the transpiration of its leaves only, twenty ounces of water in twenty-four hours.

Experiments by farmers in malarious districts might result in the confirmation of the idea that the sunflower exercises a healthy influence over miasma Should such result ensue, it would require a long time to communicate the fact to the people, for our farmers are not, as a class, readers of agricultural

HAY AND GRAIN.

liming is more perceptible on land con-Increased railroad facilities have so taining humus or vegetable mould, increased the price of hay within a circle of fifty miles radius around Phila delphia, that it is high time our farmers were altering their plan of wintering the permanent farm stock. Forty-five years ago, hay was hardly a saleable commodity fifty miles from the city, and it was but natural that farmers should feed it to their horses, cows, oxen and other PERMANENT stock, and feed almost exclusively of it, saving the more winter, hay was, much of the time, worth as much or more per pound in the city than corn, and within forty miles of the city was worth one and a rich in phosphates or ammonia. We have nevertheless, an antidote for this have, nevertheless, an antidote for this price. Some farmers were compelled half cents per pound: at the same time trouble which should always be resort to buy and haul hay for a considerable ed to when loss is likely to ensue from distance; but were they right in so Would it not have been more and salt (chloride of sodium) absorb the anmonia set free, and form sulphate of ammonia and hydrochlorate of amcord and hydrochlorate of amcor monia, which are soluble and in condition to be returned by the rain for the use of the crop. It would be well to state in this connection that this is the real benefit to be derived from plaster. (which is but a different form of lime.) same weight of think the farm will suffer. Good Not being of high value as a fortilizer in itself, but having an affinity for ammonia—which is very volatile and liamonia—which is very vo monia—which is very volatile and liable to be lost by evaporation—it lays hold upon it as it passes from the decomposing vegetation in the earth, and also absorbs that which has escaped, and is returned by the rains, and is thereby brought directly to the fountain from whome the plant draws its nour-beauty pays for bone and for the farmer to invest the money he usually pays for bone and the farmer to invest the money he usually pays for bone and the farmer to invest the money he usually pays for bone and the farmer to invest the money he usually pays for bone and the farmer to invest the money he is the farmer to invest the money from whence the plant draws its nour-ishment. I would advise, therefore, a more general use of plaster, or plaster, and salt, to be sown on top of the ground, especially where amproniated fertilizers have been used, also to be fertilizers have been used, also to be sown on barnyards and ir, stables and chicken houses, to sav, the ammonia which otherwise would be ammonia takes good care of the manure, will be done in the best and most substantial manner, at short notice. A solution of experience (sulphate of iron) will answer the same purpose applied to stables, and is one of the best need to buy either lime or phosphate? usinfectants for cellers and out-houses. ask: Does not every farm contain all

LEMONS WHOLESOME .- When people feel the need of an acid, if they would let vinegar alone and use lemons or more readily, and is less liable to suffer from drought. From these thoughts and receive no injury. A suggestion we would conclude: First-That but a may not come amiss as to a good plan, when lemons are cheap in the market. to make good lemon syrup. Press your hand on the lemon and roll it back and Second-That lime applied to forth briskly on the table to make it squeeze more easily; then press the juice into a bowl or tumbler-never into a tin; strain out all the seeds, as they give a bad taste. Remove all the depleted condition. Third—That only in combination with the mineral constituents of the soil that are available, and see the soil that are available. and such vegetable and animal matter enough; then strain the water with as may be supplied, can its full benefit the juice of the lemons; put a pound of white sugar to a pint of the juice; the second point of our subject,—the juice of line monade is ready. Put a tablespoonaction of lime upon and in connection ful or two of this lemon syrup in a glass of water, and have a cooling. healthful drink.

own fertility?

PASTURING MEADOWS .- A corres pondent of the Vermont "Farmer" writes: I do not believe in feeding

close, pulling up the grass by the roots, see that lime, potash and close, pulling up the ground, which they are very apt to do, especially where it is newly seeded. I want to get my having done so early that the second crop of clover will be in blossom, so I severe frost, which is earlier than mos up sufficient to protect the roots through our freezing Winters. I top dress to

some extent.

WHEN TO CUT HAY .- It would seem as if by this time we should understand sufficiently the theory and practice on ing crops, and in kird and quantity more than sufficient to supply their further discussions. But its magnitude is such, that, like the celestial bodies, some new phase is continually present and it is only when the test of actual experiment is applied that a critical observer can become satisfied. As to the time of cutting grass for hay, the testimony of the farmers in Massachussetts was drawn out some dozen years ago by the action of the State Board of Agriculture, and it was emphatically to the point that timothy and red top should be cut when in full blow, and

red clover when half the heads are in Oxford Republican. HEN MANURE FOR ONIONS .- The f their values and uses.

In the first place, the flowers abound manure, where only a small quantity is MEDICINAL.

NECARBITTED EUREKA !

MEDICINAL.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the na-tive herbs found on the lower ranges of the Sierra Nevada mountains of Califorare extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of Vinegar Bit-ters!" Our answer is, that they remove Triks?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world have needline been compounded possessing the remarkable qualities of Vixedan Buttans in healing the sick of every disease manis heir to. They are a gentle largative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs in Billous Diseases

Diseases
The properties of Dr. Walker's VINIGAR HITTERS are Aperient, Diaphoretic, Carminative, Nutritions, Laxative, Diarctic, sedative, Counter-Irritant Sudorific, Altera-tive, and Anti-Bilious.

EGAR BITTERS the most wonderful Inigorant that ever sustained the sinking No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond

Grateful Thousands proclaim VIN-

Bilious, Remittent and Inter-Biffols, Kellistent and Inter-miffert Fevers, which are so preva-lent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohlo, Missouri, Illinois, Tennessee, Camberland, Arkan-sus, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Sayannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive de-rangements of the stemach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. WALKER'S VINEGAR BITTERS, as they will speedily remove the dark-colored viscid matter with which the

bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Fortify the body against disease by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold of a system thus fore-armed. Byspensia or Indigestion, Head-ache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour

Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitatation of the Heart, Inflammation of the Lungs, Pain in the region of the Kid Lungs, Palli in the region of the Kis-neys, and a hundred other painful symp-toms, are the offsprings of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertise-Scrofula, or King's Evil, White

Swelling, Of Alligs Path, White Swellings, Ulicers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Discuses, Walker's Vinegan Bittens have shown their great curative powers in the most obstinate and intractable cases. For Inflammatory and Chronic Rheumatism, Gout, Bilions, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases

the Blood, LIVER, Kloneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases.—Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of WALKER'S VINEGAR BITTERS occasionally.

FOR Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pinaples, Pustules, Bolls, Carbuncles, Ring-worms, Scald-head, Soro Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried or nature, are literally dug up and carried out of the system in a short time by the use

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermituges, no anthelminities will free the system from worms For Female Complaints, in young

or old, married or single, at the dawn of wo-manhood, or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the, skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and creamse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

A. J. MILLER,. Firm DAVIS & MILLER,

After Twenty years' experience, we can assert with-at fear of contradiction, that

is the only medicine that can be depended upon to cure this disease. Thou ands of the citizens of Fulledclphia can testify to this fact, and in their name we advise all mothers, whose children are afflicted with this distres-ing complaint, to try
