the letter of a reliable and intelligent method can easily be tried on dairy gentleman in New Jersey, detailing his success with a single flock. It is true that his proximity to a large city gives | Profits from Twelve Cows in One Year. him superior advantages, but we can have repeatedly purchased flocks in the Fall for from \$60 to \$80, and have sold in the following Spring nearly \$100 worth of lambs and wool, having the flock left in good condition. Market 1573, from twelve cows, 2,636 pounds of butapproximate to his results. I myself they are secure from dogs. A three-quarter Southdown buck runs with them, and the lambs come in from the last of January to the middle of March.

Last year my early lambs brought and strong the year.

We need in the family 100 that time. I bought a farrow cow the middle of October, making thirteen for the rest of the year, and call it to average twelve during the year.

We need in the family 100 that time. I bought a farrow cow the middle of October, making thirteen for the rest of the year, and call it to average twelve during the year. Last year my early lambs brought me five dollars each, some of them not much over two months old. By having a good shelter, not too close, the lambs will do well and offer them. They will thus improve very rapidly and soon be marketable. A pen made of pine poles across the sheep yard, accessible to the lambs and not to the

sheep, will answer the purpose.

If our farmers can only be induced touches our finances.

Extract of a letter of a New Jersey farmer. 'As to sheep, I will cite an instance from my own experience. Year before last I purchased 100 head of sheep at the Philadelphia Drove Yards for \$150, mostly ewes. They had evidently been very hadly cared for by some one, as they were very poor indeed. I gave them an excellent chance on grass dur-ing the Summer and Fall. Before feeding time I sold 40 of them for \$176, reserving sixty of the best, all ewes, which had been running with a full-blooded Southdown buck. They com-menced to lamb about the latter part of January, and were all in by the first of March, and there were altogether eighty four lambs. I began marketing them toward the latter part of March, at \$9 per head for the first 30, and \$8 them toward the first 30, and \$5 at \$9 per head for the first 30, and \$5 per head for the rest. I sold from this lot of 60 ewes and 84 lambs \$1,003 worth, and had 11 ewes and 3 choice Family use, 180 lbs. at 35c, 65 10 sold calves, pigs, and pork 120 00 Pork salted, 500 lbs. at 7c. 35 00 lbs. at 7c. 35 00 likilled one calf, worth 5 00 1,377 12 102 pounds, and the heaviest 165 lbs.
I take to myself the credit of bringing Cost of meal for cass the sheep to such a satisfactory condiference on butter to compare the sheep to such a satisfactory condiference on butter to compare the compare to the compare the compare the compare the compare the compare the compared to the compa tion, but attribute no inconsiderable part of the success with the lambs to

tention to his business; but did it not pay? His figures speak for him. We hun, not having a great city near us, but his letter shows that there is a handsome profit in the careful handling of sheep. Woolen mills should be busy upon many streams of our country. hope the subject will be further discuss ed in your columns by abler and more experienced farmers than myself. HENRY C. HALLOWELL."

A HANDY GARDEN ROLLER.

Cor. Country Gentleman. Take a joint of stovepipe, 6, 7 or 8 inches in diameter; set one end upon end. Then with a pair of compasses find the center of these two wheels, and strike around their circumference, allowing for the thickness of the iron. Saw or cut them true and round; bore from Hamilton county, Ohio, says the a hole with a bit in their centers, to system of all good hog raisers in that about three inches longer than the length of pipe. Nowfit in one of these heads, and upset the sheet-iron pipe over it enough to hold it firmly in place. Put the shaft in, and set the whole on its end on the ground, taking care that the shaft stands true; and lastly put in a quart or two of dry sand, and tamp it hard with a suitable rammer, repeating the operation till the pipe is full to within one inch of the top. Fit in the other end with the shaft in place: upset the iron over it as before, and you have a roller as serviceable as one of all iron, and at almost no cost. To fit it for use, make a box of inch stuff; fit a handle to it, sloping at an angle of twenty degrees from the bottom board; be beaten. If wanted heavier, it can be loaded with brickbats or earth; and for wheeling stones or rubbish off garden or lawn, or newly plowed or spaded grounds, it will be pronounced by all who try it "tip-top." Any man or boy who can use a saw, plane and hammer can make one in a few hours and should be cleaned by scraping and should be cleaned by scraping and mer, can make one in a few hours, and with decent care it will last as many

The Feeding of Young Turkeys.

From the American Agriculturist. Why is it that one farmer will raise nearly every turkey-chick that comes out of the shell, and do this nine years out of ten, without much respect to to have a fine tilth of the surface.wet or dry seasons, while another loses from half to three-quarters with about the same uniformity? We know of men with whom success is the established rule. They are very systematic in this, as in all their other business. We visited one of these thrifty farmers, who raised 165 turkeys last year from hens, and upon inquiry found he nine did about the same thing every year. We wanted to know just how he managed to secure this uniform result, and aged to secure this uniform result, and the plague of many housekeepers, and upon good stock to begin with—the best always selected to breed from.—

Keep it in a common dredging box, label it poison, and apply it weekly to their haunts.

Bed bugs or chinch bugs ular feeding during the Fall and Winter, so that the flock becomes very gentle, and the hens make their nests im- ed, with this remedy; and both cockmediately about the sheds and barns in roaches and bed bugs will flee from places prepared for them. This is a powdered borax.

great safeguard against foxes, skunks, crows, hawks, and other creatures that destroy the birds or their eggs. When the young first come off the nests they are confined in pens for a few days un-From the American Furmer.

We give below an abstract of a letter from Mr. Henry C. Hallowell, of feeds frequently with coarse corn meal

Montgomery county, Md., which was and sour milk until four o'clock in the Montgomery county, Md., which was read at a recent meeting of the State Agricultural Society. The experience which he gives is seconded by many, even in this State, where sheep-raising can scarcely be said to be a part of our agricultural system. Only a few weeks ago a young farmer of Queen Anne's told us, as an illustration of the profit in them, that at that time he already had 27 lambs from 19 ewes, and all doing finely:—

and sour milk until four o'clock in the afternoon. He found in his experience that he lost a good many chicks from the food hardening in the crop. There is danger from overfeeding. As the chicks grow, the sour-milk diet is increased, and during the Summer it is kept constantly in a trough for them. They are exceedingly fond of sour milk and butter milk, and they grow very rapidly upon this diet. An incidental advantage, and a very important one

had 27 lambs from 19 ewes, and an digit advantage, and a very important one affock of sheep could not be raised, of larger or smaller size, and the profits derived therefrom would go very far towards paying our taxes. The beneficial effect upon the land is well understood. This, with Indian meal, constitutes their actived the strength of the streng To show what may be done in this insects are more abundant, and they respect, I give herewith an extract from wander farther from the house. This

S. C. Drew, South Royalton, Vt.

flock left in good condition. My rule is to bring up the sheep into a tight yard every night. This does not injure them, even in the most sultry weather, as they are creatures of habit, and immediately lie down and amount of the sultry lie down and amount o diately lie down and ruminate, and are youngest of them are 22 years. I then ready to go to feeding as soon as let out very early in the morning. By of butter, and did not use the milk of having the yard fence high and strong, one cow for ten days of that time. I

a good shelter, not too close, the famous will do well, and after they are a few weeks old there should be a place for feeding them separate from the sheep. cents, sent to market each week. The

hogs. I sold \$120 worth of calves, pigs, and pork, and saved 500 pounds to ascertain the value of sheep, we will not be long in procuring a proper law for their protection, as we are very apt I killed one calf worth \$5. Cost of to become earnest about whatever sending butter to market, freight and express, \$60. I use the patent Jewett milk pans, and would not part with them for anything I ever saw for butter making; would dread to go back to small pans. I consider them as laborsaving as the mowing machine. The temperature is easily regulated in hot weather, and in cold the milk is all warmed alike, as it stands the same height. They will improve both the quantity and quality. I think no good dairyman would be willing to give them

up after trying them. My cows are all breeds, a mixture of native, Devens, Durhams, and Jerseys. It took for a pound of butter in June, 22 pounds of milk; the last of Summer about 21. I now make a pound of butter from 20 pounds of milk, and skim in 26 to 28 hours after straining. My account for the year stands as fol

We see from the foregoing that this careful and successful farmer paid \$150 for a flock of 100 sheep, sold \$1,179 worth, and still had 3 lambs left. Of course, he gave close and indicates Leaving \$93.50 per cow to pay for done in the notice.

WHAT IS A BLOODED HORSE?-He ingly large arteries and veins; and put in motion, it acts in driving him to speed, the same as an increased amount of fire under the boiler drives off a greater amount of steam, and makes the machinery go faster. This large amount of blood also acts in refining the skin, making it and the horse finer than in a horse of less blood; it refines and gives elasticity to the muscels, the an inch board, and with a scratch-awl feet, etc.; it refines the entire horse, or pencil mark around on the inside; making strong the valuable parts, and reverse the pipe and mark the other fitting the whole system for speed and Carriage Wheels, Rims,

PASTURING HOGS .- A correspondent receive a shaft of half-inch round iron region is to pasture hogs on clover will pasture five hogs four months, and that it will take the corn from half an acre to feed them the same time. The cultivation of the corn he counts equal to the rent of the other half acre. He further claims that the hogs pastured on clover are in far better condition than if fed on corn, as they are larger framed, healthier, and eat better, and also states that the land is enriched by the clover pasturing.

An old farmer, in the "Germantown Telegraph," says "the practice of coating the bark of fruit and ornamental put a cross head to the end of it, and trees with whitewash, is one that can-for a garden or walk roller this cannot not be too severely deprecated. The obstruction of respiratory organs and orifices, whether effected by the applicashould be cleaned by scraping and washing down thoroughly with a solution of potash or soda in water, affording smoothnesss to the surface without obstructing the pores."

THOROUGH CULTIVATION .- The" Live Stock Journal" says: Farmers are generally too much in a hurry in the Spring to cultivate thoroughly, so as Nothing will pay better than extra cul-tivation. We would rather have extra rule should be to sow no more ground than can be well worked, this would produce more bushels of grain than per cent more gain.

their haunts. Bed bugs or chinch bugs may also be dispersed and utterly rout-

IMPORTANT NOTICE. As the long nights are upon us, when more artificial that is necessary, it behooves all who require a good

ILLUMINATING OIL to examine it carefully and ascertain beyond the possibility of a doubt its perfect safety. It is an established fact that four-fifths of the ordinary Coal bil found in the market is quite inflammable and dangerous, igniting readily at ordinary temperatures when brought in centact with the flame of a lighted match. During the Winter the newspapers almost daily record the fact of terrible suffering and death from the taking fire of Coal oil by the breaking or uparting of lamps. All danger of such results might be entirely avoided by the use of

PRATT'S ASTRAL OIL, free not only from the danger of explosion, BUT FROM THE DANGER OF THE OIL TAKING FIRE SHOULD THE LAMP BE UPSET OR BROKEN. We can endorse this Oil as EXTRA SAFE

with the fullest confidence, after an experience of over three years, during which period we have handled upwards of PIFT-TWO THOUSAND OALLONS, which has been used in thousands of families with great satis-faction, and from the use of which no accident has occurred, either directly or indirectly. It is put up in One gallon, Five gallon and Ten gallon parkages; each Can is closed with a metal-cap, bearing the manufacturer's stamp. A large atook just received and for sale, wholesale and retail, at the lowest rates, by the Manufacturur's Agents. E. BRINGHURST & CO.,

Dyspepsia, Liver Complaint, Jaundice, Billiousness, Sick Headache, and Hab-itual Costiveness. What is Life without the enjoyment of health? If you had the wealth of Creens, and afflicted with Dyspepsia, or its kindred diseases, you could not enjoy life. Dyspepsia is a prevalent disease in the United States, brought about by our habits and irregularities. The Materia Medica has been exhausted to find a remedy, and the skill of the most learned Physician has been exhausted to effect a cure. Notwithstanding this declaration, we unhesistatingly say: WHILLIE'S DYSPEPSIN' is a certain cure for Dyspepsia and the many complaints incident thereto. It has been before the public as sufficient length of time to fully test its nactits, and in every instance where it has been used according to directions, it has tesulted in giving relief and effecting a cure. With each bottle is a Circular describing the symptoms of the diseases named, and freshich only we claim it as a specific. 29-tilive it a fair trial, and rest assured you will be benefitted.

CARPETS AND OIL CLOTHS.

EVERY DEPARTMENT.

We realize the fact that, in view of the scarcity of money, Goods must be sold low; and possessing special lyantages, none are better prepared to do it. Under all circumstances, this, combined with fair dealing, is the old plan by which a successful business can be established and retained. 23-10UR PATRONAGE SOLICITED. Rising Sun, Md., April 1, 1874.
