follow, viz: the advantage of repeated applications of small quantities of lime, and the wastefulness of the old system Buckwheat may be sown towards the end of this month or in next, either for the grain or to turn under. For of heavy dressings. Lime enters into the composition of most crops, but the quantity required for this purpose is so soil. It prefers a rich sandy loam, but small, and the natural supply in most does finely on stiffer ground, provided it is rich and well prepared. Unfermented manures is not suitable for this soils so abundant, that we can hardly attribute the effects of its application to this cause. From all these facts, we should expect to find limestone soils a very fertile class, and when the other a mixture of ashes and bone dust, or a good swample of the statement of th good superphosphate, will either of them be found a proper application. Two or three pecks of seed suffice for essential elements of fertility are present, such is the case. We are not certain that lime as carbonate acts an acre, sown broadcast. From its in the same manner as in the caustic tendency to shatter, this grain is cut before all the seed are fully ripe, say when about half of them have turned state; that its application to soils light and heavy, mineral and peaty, has been found beneficial is undoubted. Its black. As soon as the straw is dry if influence may partly be ascribed to should be threshed out. physical causes, making stiff clays more

HARVEST.

Make your preparations in time.-Have your implements in order and on the spot. Risk having too large rather than too small a force, as something is A correspondent of the "Poultry World" gives the following practical almost certain to arise to weaken your numbers as the work progresses. Your ndividual attention to the preparations I have never yet had a case of croup will do much to insure successful working when the real labors begin. Do on my yards, nor lost a fowl by disease of any kind, and have had considerable of any kind, and have had considerable experience, first and last, with different varieties. I believe it much easier, cheaper, and better every way to keep away from trouble than to get away from trouble than to get away. away from trouble than to get away to do with securing satisfaction and from it. My system of management is contentment among your hands. Men very simple, and only consists in follow- working in the heat of the harvest field ing the good advice which has been given over and over again in the col-umns of this journal, so I have no in-ing drinks will be found to be conduneed ample provision for their physical tention of getting it copyrighted or patented. In the first place, a person well as lead to health and good spirits commencing to keep poultry should be sure that the birds which he purchases

CUTTING CLOVER.

are not only strong and healthy themselves, but are from stock of known good constitution. I believe constitutional strength or weakness exists in fowls as in animals or men. It is adput up into small cocks, which when mitted that a man whose parents, or cither of them, died of consumption, or committed suicide, is considered by Life Insurance Companies, an "extra hazardous risk." The same rule will apply with equal force to fowls.

Mr. Lewis Wright says: "In selecting a cook for headings are the selecting a cook for headings and it will be found green, fragrant and nutritious. Clover left to fully ripen its blossoms loses its leaves, becomes its blossoms loses its leaves, becomes chaffy and is not worth half what that taken that he has grown up strong and did not suffer from weakness in his young days." I go even farther, and

MEADOWS.

It is a good plan, as soon as the crop is cut, to put on some kind of a fertilizer. Λ good rich compost and some superphosphate, or bone dust, ashes and plaster, applied in such quantity and proportions as you can command will pay you for the cost and trouble

WATER FOR BEES .- " Bees escaping to the forest, almost invariably locate ble, perfectly tight, excepting means for ample ventilation, without a possibility of a direct draft reaching the fowls at night, after going to roost. A believe water is essential in breeding easily as a person. Keep the roosting apartment clean and sweet by frequent natural supply is at hand."

ILLUMINATING OIL

to examine it carefully and ascertain beyond the possibility of a doubt its perfect safety. It is an established fact that four-fifths of the ordinary Coal Oil found in the market is quite inflammable and dangerous, igniting resultly at ordinary temperatures when brought in contact with the flame of a lighted match. During the Winter the newspapers almost daily record the fact of terrible suffering and death from the taking fire of Coal Oil by the breaking or upsetting of lamps. All danger of such results might be entirely avoided by the use of

PRATT'S ASTRAL OIL, ree not only from the danger of explosion, BUT FROM THE DANGER OF THE OIL TAKING FIRE SHOULD THE LAMP BE UPSET OR BROKEN.

EXTRA SAFE, with the fullest confidence, after an experience of over three years, during which peried we have handled upwards of FIFTY-TWO THOUSAND GALLONS, which has been used in thousands of families with great satisfaction, and from the use of which no accident has occurred, either directly or indirectly.

MEDICINAL.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of tive herbs found on the lower ranges of the Sierra Nevada mountains of Califor-nia, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked. "What is the cause of the unparalleled success of VINEGAR BIT-TERS!" Our answer is, that they remove the cause of disease, and the patient re-covers his health. They are the great covers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of Vinedan Bittens in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs in Bilious Diseases

DYSPEPSIN

Dyspepsia, Liver Complaint, Jaundice, Billiousness, Sick Headache, and Hab-itual Costiveness.

What is Life without the enjoyment of health? If you had the wealth of Crosus, and afflicted with Dyspepsia, or its kindred diseases, you could not enjoy life. Dyspepsia is a prevalent disease in the United States, brought about by our habits and irregularities. The Materia Medica has been exhausted to find a remedy, and the skill of the most learned Physicians has failed to effect a cure. Notwithstanding this declaration, we unhesitatingly as: "MILLER'N DYNIPEPSIN" is a certain cure for Dyspepsia and the many complaints incident thereto. It has been before the public a sufficient length of time to fully test its merits, and in every instance where it has been used according to directions, it has resulted in giving relief and effecting a cure. With each bottle is a Circular describing the symptoms of the diseases named, and for which only ve claim it as a specific. Against it a fair trial, and rest assured you will be benefitted.
