Every man who has a fondness for any particular branch of industry, reads diligently and cautiously, ponders on acre of the refuse fime and ashes mixed what he reads, must sooner or later and you will soon be able to arrive at obtain a fund of information, useful to the yearly quantity your soil will re himself assuredly, and very probably, if rightly communicated, useful to other quantity you may habitually use. Its ers similarly interested. I am one of application will be especially valuable those who read the AMERICAN FARMER in your orchard. with much interest, reflect a good deal on what I read, and with much difficulty form opinions and conclusions, satisfactory at all events to myself, and sufficiently important to be well considered by others, if not adopted as incontestable truths. The friction of clashing opinions is even in itself useful, because it brings out sparks and rays of light, illumining the darker points of vegetable mysteries. It sets men to thinking, and when once we get them to think seriously, they become more appropriating money to assist agriculand more rational, less and less mere

There is a great deal of farming done in Maryland (and no doubt in other places) carclessly, and almost without founded upon a difference of opinion as places) carelessly, and almost without a reason, unless the latter be that it involves the least trouble. There are far too many very careless and thoughtless in the performance of necessary duties, upon which they depend for a living. They are very industrious, up late and early, pushing and driving all premiums for sheep and cattle are too day long. They ought to be successful and well-to-do farmers, enjoying the small, or not properly divided between the different classes or breeds; and gencomforts and luxuries of the farm, hap- erally all oppose it because too much py and contented. But such as these are not in any sense contented or happy, not prosperous, have no comforts, the State Agricultural Societies and are wholly strangers to luxuries. They \$1,000 each to the several district and labor hard and are very sanguine, but operations.

labor, may we not inquire, why not? and answer the question fairly. In all occupations there are types of a class, varying a little from each other, but still sufficiently alike to form the basis of our observations. These are the careless and industrious men, of whom I mean to say something, I hope for their benefit, though the hope is not a very sanguine one. They are generalwedded to their idols, and not easily convinced or reformed. Early habits are their controlling deity, and they usually worship at that shrine until death closes their career forever.

There are a great many farms very indifferently cultivated, carelessly so: there are some properly and carefully attended to. In the one case there is In the first, the dwelling is generally poor, and the gates poorer still. Along persistently grow. The implements of culture has not been dealt fairly with in husbandry are generally left exposed to California there are none so much to the weather day and night, rain and shine, and all about can be found the of the farmers. broken pieces of plows, spades, cultivators, &c., thus seriously damaged by hard and carcless usage. Most fre-

direction evidence of a thriftless waste. Nothing is cared for as it should be. Comfort has long been unknown .-Economy is considered a necessity, and

ly see that industry is often useless, that it is paralyzed by excessive carelessness, and a neglect of the minor details so essential to successful farming. Nor is it alone to these lesser points that so much misfortune is attributable, for very frequently greater ones are heedlessly passed by. Attempting too much generally ends in accomplishing too little. Let every-thing be done in order. Be industrious, but especially careful to avoid that is up-hill business to go against the kind of industry so lamentably neutralzed by carelessness.

Ashes and Lime as Fertilizers.

on sandy or gravelly soils deficient in potash, especially for Indian corn, potatoes, carrots, beets, etc., which require considerable amounts of alkali. Its application to leguminous cross as application to leguminous crops, as peas, beans, clover, lucerne, etc., is especially marked by increased activity of growth. If the soil is poor, however, ashes should not be applied alone, clover, ashes should not be applied alone, clover, ashes would not be applied alone, clover, as a cl since they quickly exhaust the organic matter; therefore, manure should also have almost saved a crop by sowing matter; therefore, manure should also be used, in order to reach the best results. Ashes also have an important old worm fences. It is the cheapest in mechanical action on soils, rendering light soils compact and strong clayey ones more friable. On clay formed by a way almost saved a crop by sowing the large light soils compact and strong clayey ones more friable. On clay formed by a way almost saved a crop by sowing the large light soils are lightly soils and strong clayer and keep the bottom rail up. It is a way almost saved a crop by sowing the large light soils are lightly soils and strong clayer lightly soils are lightly soils. the breaking down of granite and other rails now that were not new forty years rock containing potash, the effect is not so marked, for the reason that the soil time, but I did not know as much then contain a fair proportion of this import-ant element. Unleached ashes act more quickly than when leached and therefore should not be applied in so large drantities. The soluble portion of hard ance of the butter globules, when viewwood ashes is from thirteen to fourteen ed with the microscope, distinguish the per cent; the insoluble portion or refuse various qualities of milk. In sweet

various; they supply to the plant inorganic constituents; they act chemically remain in it. Boussingault's experi-

od ashes may be applied; these would supply, if good from fifty to sixty-five pounds of potash

The presence of lime is always essen-

tial to a fertile soil; at least the presence of lime should be shown. Four tons of lime per acre will give one per cent to a depth of three inches. All An Essay by N. T. Hutchins, Esq., read before the Farmers' Club of Baltimore county, and forwarded for publication in the "American Farmer" by Mr. S. M. Rankin, Secretary 1 judiciously applied to any soil is beneficial.

Apply twenty or thirty bushels per

Fallure of Agricultural Appropriations.

From the Farmers' Advocate. Unfortunately, there is too much truth in the following, from the San Francisco Chronicle:

general rule, more illiberal to their occupations than the representatives of any other class, says the Sacramento Recond. Thus, when a bill was introduced tural societies in development of local industries, the farmers in the Legisla ture were generally among its worst to the best manner of conducting the societies themselves; a fruit-grower, for instance, votes against the appropriation because he thinks too little mone money is used in developing speed in

country agricultural societies, passed results are not up to expectations, and the Senate, and in the House was rein nine cases out of ten the debit foots ferred to the Committee on Agriculture. up larger than the credit side of their This committee were divided in opinion erations.

Their farming is not at all profitable. allowed the bill to be defeated for want If the comforts and luxuries of the farm are minus notwithstanding all the that representative farmers cannot, like representative men of all other classes compromise their unimportant differences of opinion and act together for the general good of their class? In the inability or disposition to do this, lies, and ever has, the weakness of the agriculturist as a political or business power in the country. If there are abuses in the management of the agri-cultural societies, withholding State aid is not the way to correct those abuses. If the farmers want these societies conducted differently, let them attend their annual meetings and select good officers and pass resolutions of instruction for the guidance. Agricultural and other industrial societies properly conducted are among the most effectual means of developing the resources of a no system, in the other it is all system. new and directing the industries of an old country. History is full of eviout of repair, the outbuilding no better dences of the fact that the most sucand not enough of them, the fencing cessful States in natural prosperity have always been the most liberal in the fences a vigorous crop of weeds support of their industrial societies, and bushes luxuriate, and in the lots a liberal sprinkling of brambles and briers are no exceptions to this lesson. If agri-

MANURES .- There is no one question which more vitally effects good farming, quently there is no garden attached to or growing of continuously good and these places, or, if one, it is a garden large crops, than that of manure in these places, or, if one, it is a garden of grass and weeds, with here and there a spot upon which a few vegetables struggle hard for the mastery.

Disorder reigns over everything in one is stable manure. There are no one is stable manure. There are no most comfort and rational enjoyment two ways about it; theory or speculashould be found, there is the least tion, doubt or misgiving need never Why is it? To what shall we attri- attend its application on any arable bute these misfortunes, for they are soil. Why stable and barnyard mareally such. Not to idleness, for he is a very industrious man; he is up early, has his hands out, and keeps pushing them under high pressure. He works that all take it for granted, an axiom which needs no demonstration or the Largest and Best Selected Stock of hard, and ought to be prosperous. But he is not, because he is the victim of controlling habits of extreme carelessness. There is no place for anything, nor anything in its place, and the whole Plants contain but few primary elements, which if we find out, we therefamily have fallen into the pit, for all ments, which if we find out, we there are chips off the old block. Go into the house of some of our careless Knowing all this, what plants contain

friends, and you will perceive in every and also the elements of manure, the chemist cannot gather and combine those elements to form a manure which will act with such uniform certainty as when the manure is elaborated through duly 'insisted upon, but it is practiced the animal system, although we would on the principle of saving at the spigot not here in the least disparage the and letting the bung-hole leak. Does Let him travel through the country, and use his eyes and ears, then very likely he will have discovered where the real truth lies. He will too frequent ly see that the second se developing Nature to the profit of the farmer, and to that must the farmer look for supplementing his farm-yard and stable manure, as it is almost im FARMERS' HARDWARE possible to collect the latter in sufficient quantity for all farm purposes.

Cor. of the Telegraph.

John Johnston's Maxims .- There is no great success in farming without hard work, but it is the good thinking that costs, not the plodding alone. It bors, but if you are sure you are right go ahead, no matter what they say. The servant is not above his master in The Western Rural in reply to a lead the field and know whether a man young farmer discusses this subject as is doing good work, and the workman Wood ashes, whether leached or unleached, are, of great value, especially on sandy or gravelly soils deficient in would use plaster if it cost me \$40 a

APPEARANCE OF MILK UNDER THE of ash works eighty-six to eighty-seven milk they are numerous and crowded per cent. Unleached ashes act slowly together. By the gathering of these and for long periods, and belong to the butter globules together, cream is formclass of carbonates.

The action of ashes as a manure is ed on the surface of milk. After butter has been made from the milk a cerganic constituents; they act chemically as solvents upon other insoluble salts already contained in the soil, and neutralize acids, &c.

Ten to fifteen bushels of unleached ashes per acre would be a good dressing, but much larger quantities of leaching, but much larger quantities of leaching, but much larger quantities of leaching the solves may be applied; these would be advacted with the microscope.

IMPORTANT NOTICE.

As the long nights are upon us, when more artificial ight is necessary, it behowes all who require a good ILLUMINATING OIL

to examine it carefully and ascertain beyond the posi-bility of a doubt its perfect safety. It is an established fact that four-fifths of the ordinary Coal 0.1 found in the market is quite inflammable and dangerous, ignit-ing readily at ordinary temperatures when brought in contact with the flame of a lighted match. During the Winter the newspapers almost daily record the fact of terrible suffering and death from the taking fire of Coal 0.1 by the breaking or upsetting of lamps. All danger of such results might be entirely avoided by the use of

PRATT'S ASTRAL OIL, free not only from the danger of explosion, BUT FROM THE DANGER OF THE OIL TAKING FIRE SHOULD THE LAMP BE UPSET OR BROKEN. We can endorse this Oil as

Dyspepsia, Liver Complaint, Jaumdice, Billiousness, Sick Headache, and Hab-itual Costiveness,

What is Life without the enjoyment of health? If you had the wealth of Crewin, and afflicted with Psychological or its kindred diseases, you could not enjoy life. Byspepala is a prevalent disease in the United States, brought about by our habits and irregularities. The Materia Medica has been exhausted to find a remedy, and the skill of the most learned Physo ione has failed to effect a cure. Notwithstanding this declaration, we undestatingly say: "MILLER'S DYSPERSIN" is a certain cure for Dyspepain and the many complaints incident thereto. It has been before the public a sufficient length of time to fully to tits herits, and in every instance where it has been used according to direction, it has resulted in giving relief and effecting a cure. With each last time of the diseases named, and for which only we claim it as a specific.

As time it a fair trial, and rest assured you will be benifitted.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of VINEGAR BITunparameted success of VINEGAR INT-TERST Our answer is, that they remove the cause of disease, and the patient re-covers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable quantities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative as well as a Tonic relieving Congestion or Inflammation of the Liver and Visceral Organs in Bilious

The properties of Dr. Walker's Vinegar Bitters are Aperical, Dispheretic, Carminative, Nutritions, Laxative, Diuretic, Sedative, Counter-Irritant Sudorific, Altera-tics, and Lotal Dillion. Grateful Thousands proclaim VIN-EGAR BITTERS the most wonderful Invigorant that ever sustained the sinking

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not de-stroyed by mineral poison or other means, and vital organs wasted beyond

repair.

Billous, Remittent and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their vast tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive deinvariably accompanied by extensive de-rangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powtreatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's Vinegan Bittens, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time chaptering the secretions of the liver stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Fortify the body against disease

by purifying all its fluids with VINEGAR BITTERS. No epidemic can take hold of a system thus fore-armed. Dyspensia or Indigestion, Head-ache, Pain in the Shoulders, Coughs, Tightness of the Chest, Dizziness, Sour

Eructations of the Stomach, Bad Tasto in the Mouth, Bilious Attacks, Palpita-tation of the Heart, Inflammation of the neys, and a hundred other painful symp-toms, are the offsprings of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertise-Scrofula, or King's Evil, White

Swellings, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Hollammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, etc. In these, as in all other constitutional Dis-cases, WALKER'S VINEGAR BUTTERS have shown their great curative powers in the most obstinate and intractable cases. For Inflammatory and Chronic

Rhemmalism, Gout, Billous, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys and Bladder, these Bitters have no equal. Such Diseases are caused by Vittated Blood.

Mechanical Diseases,—Persons en-

Mechanical Diseases, —Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to paralysis of the Bowels. To guard against this, take a dose of Walker's Vinegar Bitters occasionally.

For Skin Diseases, Eruptions, Tetter, Salt-Rheum, Blotches, Spots, Pimples, Pustules, Boils, Carbuncles, Ring-worms, Scald-head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors and Diseases of the Skin of whatever name or nature, are literally dug up and carried

and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vernifuges, no anthelminities will free the system from worms like these Bitters. like these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of wo-manhood, or the turn of life, these Tenic Bitters display so decided an influence that improvement is soon perceptible. Cleanse the Vitinted Blood when-

Cleanse the VIIIAted ISIOOU whenever you find its impurities bursting through
the skin in Pimples, Eruptions, or Sores;
cleanse it when you find it obstructed and
sluggish in the veins; cleanse it when it is
foul; your feelings will tell you when. Keep
the blood pure, and the health of the system
will follow.
