closing order, but left the way open to put it again in operation if appears that it will be necessary.

State Fuel Administrators were given permission to keep the order in force in their states if it appears that it should be done to relieve fuel shortages, and also were authorized to put into force any other restrictive measures that special circumstances make necessary.

The part of the Monday closing order establishing a priority list in coal distribution wil be continued generally as will the embargoes placed on railroads by Director General McAdoo. The operation of the priority arrangement and the embagoes, Fuel Administrator Garfield said, promises to solve the fuel problem unless there is a return of bad weather.

"OVER THERE"

"They say, who have come back from Over There that at night the troubled earth between the lines is carpeted with pain. They say that Death rides whistling in every wind, and that the very mists are charged with awful terment. They say that of all things spent and squandered there young human life is held least dear. It is not the pleasantest prospect for those of us who yet can feel upon our lips the pressure of our mother's good-bye kiss But, please God, our love of life is not so prized as love of right. In this renaissance of our country's valor, we who will edge the wedge of her assault make calm acceptance of its hazards. For us, the steel-swept trench, the stiffing cold-weariness, hardship, worse For you, for whom we go, you millions safe at home what for you?

We shall need food. We shall need care. We shall need clothes for our bodies and weapons for our hands We shall need terribly and without failure supplies and equipment in a stream that is constant and never-ending From you, who are our resource and reliance, who are the heart and hope of that humanity for which we smite and strive, must come these things
