in announding its wheat production meeds of this country and its allies for this cosential food. The last grop report for casted a 1918 harvest wheat wheat

Although this forecast is gratifying, it is pointed out that the reserve or carryover of wheat this year is practically exhausted and is se amailest on record. The need of collding up reserves of wheat is evilent. It is pointed out that although this country produced a small wheat crop in 1917, the total export of wheat excess of imports, including flour terms of wheat, amounted to apthe year ended June 30, 1918. This is comparison with 178,000,000 bushche exported in 1917, 236,000,000 bushde la 1916 and 331,000,000 bushels in 1915. It was only possible for the Un-Meater to export wheat in large to 1915 and 1916 because of berge wheat crops of 1912-13-14-15 mre this country an accumulaof etecks of this grain. The 1916 1917 crops both were smaller than crops since 1911, and besides this, was a greater demand for seed It must be borne in mind.

for these additional requirements it is area. And this gives it a nocturnal ef- trich tassels, bands and tips, as well therefore extremely desirable that the fectiveness no other small arm posses as with paradise. maximum arceage of winter wheat rec. ses. ommended be planted by the farmers in the United States this fall.

Packers' Profits -Large or Small

Packers' profits look big-

when the Federal Trade Commission reports that four of them earned \$140,000,000 during the three war years.

Packers' profits look small-

When it is explained that this profit was earned on total sales of over four and a half billion dollars—or only about three cents on each dollar of sales.

This is the relation between profits and sales:

Profits |

If no packer profits had been earned, you could have bought your meat at only a fraction of a cent per pound cheaper?

Packers' profits on meats and animal products have been limited by the Food Administration, since November 1, 1917.
