April 16, 1875-ly.

A CARD

FROM
J. MONROE MERCER,
OF "FONT HILL,"
Hickester Post Office,
Howard Co., Md.

To the Farmers of Howard County:
Having long felt the need of some FOOD FERTILIZERS—more lasting and valuable than any of the popular fertilizers of the day, I have watched with interest and sought diligently to discover a mixture which would combine in large proportions, regardless of cost, those elements which would restore permanent fertility to the soil.
Having been a farmer for many years myself, with large opportunities for observation of the effect of many different fertilizers, I have never seen altogether satisfied with any until I tried

The Popplein Silicated Super-Phosphate of Lime.

On an indifferent piece of land I have raised with this manure two crops and an oat crop, all very large, in three successive years. The last of these crops (corn) planted June 7th of this year, being now from 10 to 14 feet high, with large stalks and ears, rapidly maturing, which I will take great pleasure in showing to my neighbors.
To insure the introduction of this most valuable manure into our county, I have consented to be made sole agent for its sale in the county, and offer it to my friends and the public at the unprecedented low price of \$35.00 per ton.
Address communications and orders to
J. MONROE MERCER,
Hickester P. O., Howard Co., Md.

Election Notice.

To Judges of Election and the Voters of Howard County.

In accordance with the requirements of the Code of Public General Laws, I hereby give notice to the Judges of Election and to the voters of Howard County, that an Election will be held on TUESDAY after the first Monday, being the

6th day of November, 1877.

at the usual places of voting in the several Election Districts of Howard County, for the purpose of electing the following State and County Officers:

One person for
Comptroller of the Treasury of the State of Maryland,

Two persons to represent Howard County in the
House of Delegates of Maryland;

One person for
Sheriff of Howard County;

Three persons for
County Commissioners of Howard County;

One person for
County Surveyor of Howard County.

The polls will be open at 9 o'clock in the morning, and closed at 6 o'clock in the evening, when the ballots will be publicly counted. The Judges are required to make every effort to make their returns on Thursday, the 8th, following the election, to the Clerk of the Circuit Court.

G. W. CARR,
Sheriff of Howard County.

NOTICE.

To Hotel Keepers and all others who Deal in Liquor.

For the information of all persons concerned the following Act of the Legislature, passed March 24th, 1865, is published:

CHAPTER 191,
AN ACT Prohibiting the Sale of Spirituous or Fermented Liquors in the several counties of the State on the Day of Election.

SECTION 1. Be it Enacted by the General Assembly of Maryland, That it shall not be lawful for any hotel, tavern, saloon, drinking establishment or other place where liquors are sold, or for any person or persons, directly or sell, barter, give or dispose of any spirituous or fermented liquors, ale or intoxicating drinks of any kind, on the day of election hereafter to be held in the several counties of the State.

Sec. 2. And it is Enacted, That any person violating the provisions of this act shall be liable to indictment by the Grand Jury of the county where the offense is committed, and shall, upon conviction, before any Judge of any circuit court of this State, be fined a sum not less than fifty dollars, nor more than one hundred dollars, for each and every offense, one-half of the fine to be paid to the informer, and the other half to the county commissioners for the use of public roads.

G. W. CARR,
Sept. 29, 1875. Sheriff of Howard County.

The Popular Science Monthly is always laying its under obligations, but we doubt if it has ever done a better service than in publishing Dr. Oswald's article on "The Climatic Influence of Vegetation," which opens its August number. It is a subject of the very gravest importance to the future inhabitants of the United States, and, in fact, of the world; and it is to be wished this article could not only be generally republished in the newspapers, but made the subject of discussion in the Legislatures of every State and in Congress. There has been a perceptible change in our climate within the memory of men not past middle age. The writer knows of streams which until twenty five years ago were never dry and which swarmed with trout, that now dry up every three or four years. The destructive floods and ice gorges of which we hear so much, are due to the denudation of the hillsides along our streams of the forests that are their natural protection and serve as sponges to absorb the rainfall and give it out gradually as needed. The sterility of Greece, the Spanish Peninsula, Asia Minor, Heratia and Northern Africa is unquestionably the result of the destruction of the forests with which they were once clothed. It is a startling fact that Greece now maintains but about one-twentieth of the population it once had; that Tripoli as late as A. D. 670, had a fine climate and a population of six millions, of which number only four hundred and fifty thousand are now left; and that Southern Spain now numbers but about one-tenth of the population it had a few centuries ago. It is not doubted by those who have given the subject attention that all this change is due to the destruction of forests. In our own country processes are at work with a rapidity heretofore unequalled in any land which will conform to the laws of deserts, and therefore it is high time some systematic governmental effort were made to retard the desolation process. There is no subject which could more properly engage the attention of General De Rue, or which more properly belongs to the Department of Agriculture, than the question of the preservation and restoration of our forests. There are many thousands acres of worn out land in the Eastern States which ought to be planted with trees and left to the recuperative influences of time. Probably a study of the subject would show that certain varieties of trees could be started on these lands from seed more cheaply than they could be planted, while perhaps the exemption of forest lands from State and municipal taxation would operate as a bounty sufficient to preserve a large acreage of much needed timber from waste.

It is a singular incident of the miscellaneous policy of protection, that we are marked to him, that the men who imported from Canada, actually taxing the entire community to pay a bounty for the destruction of our own priceless forests! The subject is one of the most important which can engage the attention of our legislators, and ought to be taken up at once.—Ez.

—William Cameron, brother of ex-Senator Simon Cameron, who died at Lewistown, Pa., a few weeks ago, aged eighty-four years, served a five years apprenticeship at the tailoring business, and afterwards followed it for a number of years. When he died he owned thirteen of the best farms in Northumberland and Union counties, worth from \$10,000 to \$20,000 each. Boys, learn a trade and acquire the habits of industry and economy.

Fremont, the Home of Hayes.

SILVER CITY, NEW MEXICO,
Sept. 18, 1877.

Though at present far from Fremont, the writer is well acquainted with the town known as "the home of Hayes." Lower Sandusky, years ago, consisted of a few wooden buildings situated in the "black swamp" region of north-western Ohio. Such was the town during the war of 1812. Great enthusiasm prevailed here when John C. Fremont was an aspirant for the presidential chair. Since that time the town has been called Fremont. The Western Reserve & Maumee Turnpike passes through the place, the mile stones of which still bear the initials "L. S.," referring to the number of miles to or from Lower Sandusky. The Sandusky river is quite a stream and passes through the town, dividing the "East Side" from the "West Side." The street is crossed by a wooden bridge, which is a handsome little river is the Sandusky, flowing smoothly and lazily in low banks through a generally level and well wooded country. At Fremont it would require a strong man to throw a stone across the river, which is crossed by a wooden bridge, which is a handsome little river is the Sandusky, flowing smoothly and lazily in low banks through a generally level and well wooded country. At Fremont it would require a strong man to throw a stone across the river, which is crossed by a wooden bridge, which is a handsome little river is the Sandusky, flowing smoothly and lazily in low banks through a generally level and well wooded country. At Fremont it would require a strong man to throw a stone across the river, which is crossed by a wooden bridge, which is a handsome little river is the Sandusky, flowing smoothly and lazily in low banks through a generally level and well wooded country. At Fremont it would require a strong man to throw a stone across the river, which is crossed by a wooden bridge, which is a handsome little river is the Sandusky, flowing smoothly and lazily in low banks through a generally level and well wooded country.
