

The Ellicott City Times.

TO OUR READERS.
This paper is a newspaper. It gives the local news and all the local news of importance. In addition to this it does not overlook current events of general interest and its family department is unsurpassed.

TO OUR ADVERTISERS.
The Times reaches all the substantial people in this and portions of adjoining counties. Its circulation is greater than the combined circulation of any two papers in this part of the State, which can be readily proven.

LIFE IN COLD SIBERIA.
RUSSIA WANTS IMMIGRANTS FOR THE SOUTHERN PART.
A Railroad is being built through South Siberia, from the Ural mountains to the Pacific Ocean, as an inducement for settlers to go there.
The railroad which the Russian government is building through South Siberia from the Ural to the Pacific ocean will open an immense country hitherto almost unknown to the world for foreign culture, and it may be of interest to see what the condition of the land is. Generally, it may be said Siberia, by the hand of nature, has been endowed not less than other countries. It produces almost every kind of European grain and fruits, even grapes, and has an abundance of all metals, iron, gold, silver, copper, lead, zinc, etc., coal, graphite, porphyry and precious stones, and it is, or has been, the home of all kinds of mammalian animals. The rivers and lakes are crowded with all kinds of fish and the arctic sea abounds with whale and seal. There are about 1,000,000 square kilometers, but the northern and greater part of it is almost waste, inhabited only by a few thousands of Samojedes and Eskimoes. The whole of Siberia is in the north almost all the year round, only melting in two or three months in the summer, when the snow never melts. The Samojedes and Eskimos seem to be related to each other. Their languages are not so different that they cannot understand each other. Their manner of living and culture is the same. It is almost the same. They are all nomads, going north in the summer and south in the winter. The whole of Siberia is in the north almost all the year round, only melting in two or three months in the summer, when the snow never melts. The Samojedes and Eskimos seem to be related to each other. Their languages are not so different that they cannot understand each other. Their manner of living and culture is the same. It is almost the same. They are all nomads, going north in the summer and south in the winter. The whole of Siberia is in the north almost all the year round, only melting in two or three months in the summer, when the snow never melts. The Samojedes and Eskimos seem to be related to each other. Their languages are not so different that they cannot understand each other. Their manner of living and culture is the same. It is almost the same. They are all nomads, going north in the summer and south in the winter. The whole of Siberia is in the north almost all the year round, only melting in two or three months in the summer, when the snow never melts. The whole of Siberia is in the north almost all the year round, only melting in two or three months in the summer, when the snow never melts. The Samojedes and Eskimos seem to be related to each other. Their languages are not so different that they cannot understand each other. Their manner of living and culture is the same. It is almost the same. They are all nomads, going north in the summer and south in the winter. The whole of Siberia is in the north almost all the year round, only melting in two or three months in the summer, when the snow never melts.
