A Man Dyed Blue.

Theophilis Cooksey Asbridge, of Lyon county, Ky., who is new a patient at the bottoms of his feet. His finger nails are blue, so are what would be in other people the whites of the eyes. His lips are blue, his tongue is blue, and Mr. Asbridge is no loubt the bluest man in America.

The doctors say that the discoloration is caused by nitrate of silver poisoning. Asbridge for years has been subject to epileptic fits, and took great quantities of nitrate of silver in order to ward them people, and the late suit is more likely off. This was gradually deposited in the skin, and on exposure to light turned a blackish sort of blue, just the way i does on a photographer's plate. His face and hands are darker than the portions of his body protected by clothing. His exchalls look like hard-boiled eggs that have been soaked in a solution of ndigo after the shells were removed. According to the medical men, it will take a good many years for his cerulean epidermis to bleach out, and it may never be restored to the original tint .-San Francisco Examiner.
