DOMESTIC HELP.

The house girl problem is one of the unsolved difficulties to be overcome by the American people, especially the ladies, to the end that all parties con cerned are satisfied. The house girl, it may be explained, is a freeborn girl, a Roman as it were, and she has found out that the avenues to preferment are as wide open to her as to the average young man, rich or poor, especially i she happens to be good looking and has the necessary qualifications. She has found out that it is her privilege to become as cultivated and speak as good English and be as refined as her richer sister, and though remaining poor and dependent, to enjoy a degree of respectability as only a country like our own will afford. As a general thing she is too ambitious and too intelligent to do what she considers the menial work of a household and be at the beck and call of a too often imperious or unreasonable mistress. Then, too, girls are ambitious to make favorable matrimonial alliances and they know that except in rare cases working in a kitchen does not present a gilt-edged outlook for the fulfillment of aspirations

in that direction. In the present aspect of things there is not much encouragement for the housewife who would prefer some one else in the kitchen other than herself Generally nowdays she can manage to get some one to do the extreme drudgery by hiring by the day and paying good wages, but her trials are many when she wishes to devote most of her cure no one who shows sufficient intelligence in cooking and who may be utterly incompetent in many other particulars, or, when she happens on help that meets her approbation, to find her "elegant girl" upon whom she had laid so much store, some Sunday morning fail to put in appearance, probably having left a note that she has bettered herself elsewhere. This is what the American housewife is enduring just now and there is not likely to be a solution of the problem for some time to come.

Even in large cities where the rich pay high wages for help the complaint is often passed around, "Well, my girl has left me and I am completetly put out and I don't know where to get another.' Mrs. Jones calls upon Mrs. Smith to unburthen herself of a weight which is interfering with a world of interesting pastime she might have had had it been otherwise, and then for an hour or more these ladies discuss the subject dry and before they part almost weep on each other's shoulders over what they regard as real trials in life. The truth is this condition of things has proved a blessing in disguise to many a young married woman. It has brought out to the public, "How the fur would fly," qualities her husband did not think she possessed. Determination and decision of character have often been the result and many a man has acquired a new admiration for his wife other than that to be found in a pretty face, cultivated mind | self to be bamboozled by the fake scienor charm of conversation.

The hired help question has come to stay and the ladies of these United States may as well square themselves to meet it. Whenever the kitchen can be made inviting enough to attract the myriads of girls who are looking for what they deem the higher walks of life then the tide will turn and not until then. This starts the Board present miserable condition of school property in many communities can now be improved without encroaching on the funds needed for a full school year.

There has been some criticism of the School Board during the past year by Republicans and their allies, disappointed politicians and repudiated office holders. that the present Board does happen, for the first time in a number of years, to be free from Republican influence. While politics should never be injected into the public school system, as was done for six years prior to the present, yet we believe that under a Democratic State administration honest, capable and upright Democrats are the best men for the keeping of any public trust, and, as the only Democratic newspaper in Howard county, THE TIMES feels itself in duty bound to call attention to the fact that while ignorance sometimes is the mother of censure, the criticisms of the present School Board, which have thus far come to light, are born of malicious and corrupt motives. A little incident occurred this week at the Pension Office which shows that politics do not enter into the present conduct of that office. A Democratic Congressman called to protest against the to hear the Prohibition leaders speak. reduction of the pension of a prominent Democratic worker in his district, and said that the man had influence enough to throw his district, which is close, to the Republicans. The papers in the case were produced and it was conclusively shown that the man was drawing a larger pension than he was entitled to, and he Congressman had to acknowledge it, although he still asked that this particular pension be not reduced. He was informed, as other Democratic Congressmen have been who called upon similar errands, that the policy of this administration was to administer the law as it

exists without regard to the politics of the pensioners. STARTLING FREAK OF A COMET.-A 10.30 o'clock Saturday night the comet which is now the object of so much search and speculation, suddenly devel oped an enormous tail which, to the unpracticed eye, was taken to be a display ofaurora borealis. At that hour Professo Frisby, of the Naval Observatory a Washington, was studying the comet through the nine inch glass. He noticed a long streak of greenish-white light shoot out from the comet and extend itself almost to the zenith. At first, the nucleus of the comet being at that moment hidden by a fleecy cloud, it was thought that the aurora borealis had sent out an advance notice of a brilliant engagement, but as there was no flickering and as the light came steadily from where the comet had last been seen, the professor concluded that he was seeing a comet in process of development. The tail of the comet was 30° in length, a distance about sixty times as long as the moon is wide, and extended from 10° above the horizon almost to the zenith. It was plainly visible to the naked eye, and was watched for some time by the corps of observers at the institution.

Subsequent reports prove that the display was from electrical causes apart and distinct from the comet.-ED Times.

Of this amount \$16,456,-662 93 is charged to construction. The estimates put the operating expenses for May at \$609,883 87 and receipts at \$719.402 71. During June the estimated receipts were \$1,660,820 21 and expenthe two months of \$1,127,417.78. The ratio of receipts to expenses to July 1. while not given in detail, is said to show a very material gain for the exposition, both in the reduction of operating ex-

penses and increased receipts. THE WORLD'S FAIR SUNDAY LAST.-The last open Sunday of the exposition did not show any improvement upon other Sundays in point of attendance, but as nearly all pass-holders paid the entrance fee of 50 cents, the fund for the benefit of the sufferers from the coldstorage fire of last Mondaywas increased in a substantial way. The total paid admissions of the day were 49,401. Saturday 94,492 persons paid to go in. It is estimated that, with the 5,000 contributed by the concessionaires the firemen's fund will be increased about \$30,-000 as the result of the day's benefit.

The balance cash on hand is about \$1,500 greater than there was reason to anticipate earlier in the school year from information given by the State zuthorities. In estimate furnished the County Commissioners the School Board had made allowance for a build ing fund of \$2.00. In the absence of addition alaid from the county, provision was made nevertheless for a surplus at the end of the year, which, however small, might be a nucleus for such building fund. That this surplus should reach the handsome sun of \$2,527.52 is a matter of gratification It marks the year as one of financial pros perity in spite of early threatening conditions, and indicates that while during the ming year the work of improving dilapi dated school property may be taken up, this dated school property may be taken up, this work will not be accompanied by any shortening of the school year.

The amount of money available this year was least han last year's amount by \$2.888.80. But for the unexpected increase in the State's fourth quarterly payments the difference would have been over \$4.00, as set forth in estimates made some months since.

Actual expenditures this year have been less than those of last year by \$5.08.15.

The school year was eight and one-half months long. This was six weeks shorter than the longest of recent years and about two weeks shorter than the briefest. the premises, the tarm upon which Frank W. Dorsey now resides, and lately occupied by William Sellman as tenant, situated in Carroll County, on the Westminster and Washington road, is miles from Hood's Mill and 3½ miles from Sykesville Stations, on the B. & O. R. R. This FARM CONTAINS 91 ACRES, more or less, and is IMPREVED BY A GOOD FRAME DWELLING HOUSE and necessary outbuildings. It is well watered and wooded and in a good state of cultivation.

At same time and place I will also offer the farm situated in Carroll County, three miles from Sykesville, on the public road leading from Sykesville to the Westminster and Washington road CUNTAINING 120 ACRES, more or less. This farm has no buildings upon it, but it is advantageously located and is in a good state of cultivation. It was purchased by Walter Dorsey from Zimmerman and Schultz, Trustees.

At same time and place I will also offer a WOOD LOT, CONTAINING 19 ACRES, more or less, situated in Carroll County, about 4 miles from Sykesville, being part of the tarm lately owned by Jonathan M. Dorsey and obtained by Walter Dorsey from Lewis C. Franklin and wife.
