THERE ARE NONE BETTER

---THAN---

R. H. POLLOCK'S

---BRANDS OF---

HIGH-GRADE BONE FERTILIZERS!

and we take pleasure in being able to offer to the Farmers of Howard county thoroughly reliable, and First-class Fertilizers at the

LOWEST PRICES

consistent with their actual value, and we invite the most critical and exhaustive tests of these brands, having conclusive evidence of their superiority.

We believe in SPECIAL GOODS for SPECIAL CROPS.

ALL FARMERS ARE NOT PROSPEROUS

who use Fertilizers, but all prosperous farmers use Fertilizers, and the results depend largely on the amount of intelligence displayed in purchasing and applying goods properly suited to the requirements.

Some people think

LARGE QUANTITIES

to the acre, should insure a large crop, while sometimes

150 POUNDS FOR WHEAT

per acre will give better results than more, this being an established fact, there must be a reason for it, why is it?

LARGE CROPS

do not depend on how much you plant, as how you plant it, and what you use on it, a Fertilizer well suited to the growth of one plant, is sometimes injurious to another, one medicine will not cure all ailments, and we carry a full line of goods suited to our various crops.
