TAPE-WORM. Mr. Samuel Fuller, inn keeper on the Hartford, ten miles from Haltimore, began about
12 months age, to be givenny affirted
with a tape-worm, which increased last in
size and strength, so as to excite the most
horid sensations by its writhing motions
and intolerable paies, resembling the gnawing and tearing of his bewels, which deprivced him of his necessary sleep, and caused
such dreadful apprecionations as cannot be
described but by one in a similar situation;
his appetite declined rapidly, and with that
h s strength, so that he was unable to attend
to any business; which he heard of some excellent ecres performed by Hamilton's Worm
Lozenges, he took a large dose, which
brought away about 4 yards (now in possession, of H. Lee); but a renewal of his pains
soon convinced him that this menstrous reptile had recovered its first vigour. Applica-Mr. Samuel Fuller, inn keeper on the Hart. tile had recovered its first vigour. Applica-tion was made for more of the medicine, with advice, from which resulted the total expulsion of his formidable enemy, in several pieces, which he supposed to be six or

eight yards mere. A few weeks have since elapsed, and Mr. Fuller is now in perfect health. The above facts are well known to a numerous circe of his aeighbors, and he himself will gratify any who may wish to make further inquiries of the subject.

Although Hamilton's Worm Lozenges produce such powerful effects, when necessary, yet they are perfectly innocent and mild in their operation on the human body, even when taken in large doses as Mr. Fuller will testify. Their peculiar mildness is abun lantly evident in the following cures of infants.

Letter from Mr. Henry Ackerman, brick-layer, in Magazine-street, near Broadway, New-York.

It would be ungrateful were I to withhold my testimony in layor of Hamilton's Worm destroying Lozenges. I had been between destroying Lorenges. I had been between 5 and 6 years past much indisposed, and latterly often termented with severe griping and pains is the bowels, troubled with ollensive breath, with violent fewerish fits, and other obvious symptoms of worms; but frequently hearing your Woom Lorenges recommended in cases similar to mine, I determined on a trial of them, as my last resource. first evacuated twelve or thirteen feet tape worm, two other doses were taken, which brought away a quantity of matter broken like skins and pieces of worms. suppose the tape worm, voided at different times, must in the whole have exceeded 49 feet. The almost incredible benefit I rereceived from this medicine, induced nie to give a dose to a child of mine who was pin-ing and sickly; it produced the same good effect in this instance, expelled a worm different kind, from nine to twelve inches ong, and at the same time restoring a good state of health
