THE WEIG.

" G112 US BUT LIGHT."

BALTIMORE: MONDAY, AUGUST 6, 1810.

By the schr Hope, capt Barnard, arrived at this port on Saturday, from N-Orleans, papers from that place to the 2d ult were received at this ffice. The Louis. G. z. (a fe teral print) of the 27th June, contains the following paragraph

with the annexed note, in writing on the margin of the paper: "Letters have been received to day

from Bayou Sarah and Baton Rouge stating that the people of those districts in West Florida, had in contemplation to form a government of themselves, that they had been for some time without law, or the semblance of government, and that self preservation drove them to the measure they were about to take .-We are promised extracts of the letters. which it handed to us, shall appear tomorrow.""

. The letters could not be published. being of too serious a nature to be inscrted in a newspaper

CENSUS.

The Citizens of Maryland are respect fully informed, that the Marshal and his assistants will commence taking the third Census this day, each and every free person more than 16 years old, belonging to any family is obliged by the 6th section of the act, under the penalty of 20 dollars, to answer the following questions!

Who is the master or mistress, steward or overseer, or other principal person therein.

2. How many free white males are in the family under ten years of age 3. How many of ten and under sixteen years

How many of sixteen, and under twenty-six years.

How many of twenty-six and under forty five years.

6. How many of forty-five years and upwards-(the three last questions will of course include heads of families). The same six questions are to be asked concerning white females of those res pective ages.

7. How many other free persons are there in the family

8. How many slaves.

9. Had say other person or persons their usual abode in the family on the first Monday of August, 1810-if any,

of what description. If heads of families or others who are obliged to answer the above questions, would reduce them to writing to be delt vered, when called for it would prevent much trouble to themselves and

cessary delay to the Marshal and his as-THO: RUTTER, Marshal.

[COMMUNICATED]

August 6

THE NEWS .- There are one or two points of view, in which the news by the recent arrival at New York, from En-

gland, deserves consideration 1 If the firejet of a treaty with G. Britain has been sent out by Mr. Pinkuey, it must indisputably be such as to ensure its cwn rejection. The British cabinet has not lately, nor ever, manifested any disposition to relinquish the insolent conditions prescribed by Mr. Canning, in the celebrated instructions of January 1809. And is it possible that our exe cutive can ever recognize, in a formal treaty, pretensions so degrading and ru incus to us? With all the christian lumility and meekness which guide their conduct, we really cannot yet believe that they are thus far lost to a sense of the nation's honor and test interests.

2. The rumours of a contemplated peace between England and France, and Russia and England, deserve no credit. They are in every view contradictory: if Russia has made peace with England, as is stated, and these two powers have coolesced'egains' France, it would puz-zle even British quidures and lawyers to tell us how, under such circumstances, France could to be at peace wi h England Manufac ured in Lord n, they were, if such a thing as a Pinkney treaty aciually exists, probably intended to operate in producing as acceptance by our government. The folks at St James's understand us too well. They have found out a deplorable secret, in respect to A merican policy. The unofficial uncensti tutional, irrseponsible conversations heid with the British minister at Washington, by men who have little more right to meddle with the exterior relations of this country, than Tom, Dick, or Harry, have too plainly shown them that our government, like the weathercock, is twirled about by every light breeze from Europe. We do trust that for his own character, and for that of the nation, which, we sincerely believe this member of our federal councils has at heart, Mr. Medison will prometly reject any arrogant terms projosed on such views

3. As to the intelligence from France it is to be temarked that it comes through the same channel with these rumou's It may be true, that Benaparte has fulminated another edict against our commercial property. We could expect little else. We have acted so il the like a dignified and spirited nation, that we have invited the insul s, the kicks and cuffs, not only of the despot of continental Europe, but of all his vassal kings. and, in fact, of every other government with which we have intercourse. In vain may we continually appeal to the honour and justice of regal rulers whose dominion over their own people has been acquired by fraud and force, for reparation of past aggressions on us, and for brarance from those to come We mustput it off a long as we can-at last return violence for violence; we shall be kick d into a war, or vilely submit to be trodden beneath foreign feet.

Elections to the 12th Congress.

The scuthern electers appear to be descrimination let all those members of Congress who voted to refical the em bargo bave leave to stay at home. in N. York, this has already been eccomplished; and by the nominations in Rhode Island and New-Hampshire, it seems they nican to follow suit. In the latter state the election will take place on the last Menday of August ensuing.

The following gentiemen a ted to compose the Republican Ticket for membe s of congress, at the nex e lection in New Hampshire.

D: Josiah Bartlett, of S. ratham John A. Harper, Esq. of Meresith David L. Morrill, Esq. of Goffstown. Gen Samuel Dississor, of Keene. Hon. Obed Hall, of Bartlett.

Ar a Republican Convention holden at Newport, R. I. on the 21st of June last,

Nathaniel Hazard Esq. of Newport, & Nathan Brown, Esq. of Johnston, were unanimously selected as candidates for Representatives in the twelfth Congress of the United States.

Married, on Friday last, by the Rev Mr Glondy, Mr. Thomas Little, to Miss Mary Cattler, both of Baltimore county

Boston, July 31. Extract of a letter from Liverhoot, to a merchant in this town, dated Liver

nool, June 4.
"The present is to mention that a bill is now before parliament for increas ing the duties on foreing umber. We annex an extract of a letter from our agent on the subject, and, we are of opinion, it will be found accurate as to the

intentions of our government. " I understand, it is intended, that the duties on deals, deal ends, deal battens, boards and oak planks, is not to take place until the 21st December, 1811; but on balks, batten ends, clap boards,

oak boards, pailing boards, pipe boards, | 2000 ruders, of 13 feet each, is to be wainstot tourds, are wood, fir quarter, extended to 5000 clistance from the sea handspikes, lath wood, masts, bowsprits, cars, spars, staves, fir timber, ufers and wainscot logs, I understand, the duty is to commence on the 30th of September pext

The duty, however, is not to attach on deals above seven inches wide and eight feet long, nor exceeding 1 1.4 inch in thickness; nor on fir, being 8 inches square, not exceding ten inches, being the growth of Norway; nor on wood

the produce of Africa.

"The act to covinue until six months after a treaty of peace, and to be exactly twice the amount of the present duty

Extract of a letter from a gentleman in Liverpool, to a mercantile firm in the

same city, dated June 9.
"In reply to your note, left late last night at my house, the information I have concerning the double duty on tim

ber, I hid yesterday from Mr. Black-burne, M. P. as follows: "That the du y on oak timber, of all sorts, is o take place on the 1st of Jan next; and on fir, and all other sorts, in Jan ofter, (say 1812.) On which Mr. Blackbuine justly remarks, that the next session will give us sufficient time to counternet both.

" It appears to me, that government have gone too far to withdraw the bill in That on secciving the several me morials, the miois ers found they were wrong in the measure partially repre sented to them, by interested specula tors, and that by putting the dates at the above distances, they have rendered the bill harmless without withdrawing it "

NEW YORK, August 3. Latest from England

The editors of the Mercautile Advertiser have been favoured with a file of London, Liverpool and Glawsgow papers to the 22d of June, received per the Lamaahinaak, from the owners, and another commercial house in this city, from which the following extracts are

We have also been favoured with an interesting extract of a letter from Paris The marine intelligence contained in the papers wilbs found in the proper depur ment.

Cape. Story, of the Tamenhmanh, informs us that the British frigate Venus, with Mr. Morier (the new charge des allairs to America) on board, was to sail from Portsmouth on the 24th of June; and that Mr Jickson was to return to England in the frigate Venus.

IMPORTANT.

Extract of a 1-tter from an American gentleman in Parts, dated May 31st, per the Tamsahmauh. from Liverpool. "Things are daily growing worse, and my hopes, which from the first were feint, are entirely extinguished. There is a report in circulation, that an order has been sent to Bordeaux to sequester any American funds which may be in the hands of the merchants in that place --This may not be well founded; but, it will not surpose me. The officers of government, are extremely vigilant in trustrating all partial arrangements. In Dunkitk, there has lately been two cases of ships captured by privateers, who compromised with the capto s, one of which was the America, of Philadelphia, and the master pied the captors 100,000 francs, and immediately on taking charge of the shipshe was seized by the efficers of government, and seques pect of any America reperty under

Yesterday merning a real from Heligoland reached London, being a series of L'Abeille du Nord to the 29th ult and letters from that island to the 8th ins; -We have also information one day later from a passenger by the packet. The intercourse with the continent had not been re-established. It was supposed, that to the amount of five millions sterling, in British manufactures and colonial produce, were deposited on the isla: d. All the tanks or reservoires were exhausted, and excepting what was impure or brackish, the inhabitants were destitute of water

scizure in this country , 'ng re:eased."

Dutch letters were received yesterday morning to the date of the 7th instant. Louis had not at that time left Holiand. and the report of his abdication of the throne appears to be wholly unfounded.

The accounts brought by the Oporto convoy are to the 22d ult. and from the British army three days earlier. French have been for some time establishing large magazines of provisions at Salamanca, from which it was concluded that they had some great enterprize in contemplation. The force of gen. Junot on that station is much larger than has been represented, consisting of 1600 cavalry and 18,000 infantry Letters cavalry and 18,000 infantry Letters from the north of Spain have also been received, viz. of the 26th from St. Sebastian, and of the 30th from Corunna. In Gallicia 'he greatest ardour prevails a mong the peasantry for the defence of the country, but they are almost without arms. It is stated that the French are now 60,000 strong in the neighbourhood of Cuidad Rodrigo and Salamanca; and that an attack upon the allies was expected by the first convenient opportunity.

We have exclusively Haarlem Cou rants to the 10th inst. The following official document o great importance, is extracted from them:

IMPERIAL DECREE.

extended to 5000 distance from the sea coast ——All probibued magazines or warehouses which shall be found within that distance, with their contents, shall be sequestrated. Such magazines and goods shall be disposed of as here-f.er determined.

Art. 2 The owners of all such warehouses as occupy the space between the old limit of 2000 ruders and the new boundary of 5000 ruders from the coast. shall be allowed to remove them within the space of 14 days from the publication of this decree.

Art. 3. Liceaced shop keepers shall give an account of the goods they have in their possession.

Art. 4. Permits shall be given to such shopkeepers for the proportion of such colonial produce and manufactures which they respectively may be allowed to retain for sale on their premises, but such quantity is in no case to exceed one third of their annual consumption

Art 5. The municipalities of the different districts shall deliver caralogues with the names of all the licenced shopkeepers in such districts, which deal in colonial produce and manufactured wares

The 6 h and concluding article, dirests the publication of this decree in the

Two Gottenburgh mails arrived this morning, by which we have letters from l'etersburgh to the 23.1, from Konigsburgh to the 25th uit. and from the port of departure to the 11th inst. At Pctersburgh colonial produce and Russian articles had undergone no material change in the price, but the Exchange had risen to 14 3-4d. The winter was one of the longest for many years known. The Neva was open at Petersburgh, but in a state of congelation at Cronstadt .-The Konigsburg letters mention the arrival of 15 American ships, and that no obstruction was given o the discharge of their cargoes or to trade in any addi-tional respect. The Gottenburg letters no.ice that 13 ships from the Baltic with corn, destined to this country, were waiting for convoy They say, that no disturbances had arisen in consequence of the death of prince Auguster burgh, and that p eparations were making for the meeting of the Dict to nominate the new heir to the Swedish crown One of cur letters observes, that apprehensions were feit that the government at Stockholm would issue a prohibitory decree to the injury of our commerce, but it was hoped that the unpopularity of such a measure would disappoint the inten-

tions of the French party in that capital.

The net produce of the stamp duties on newspapers and almanacks, for the year ending the 5th of April, 1869, a-mounted to 278,8451 3s 8d. These sums do not include the duties on newspapers, almanacks and advertisements in Scotland.

According to a calculation in a Parisien Journal, the French empire contains at present the following population: Inhabitants who speak the French lan-guage, 28,126,000;—the German, 2,705,000; the Fiemi h, 2 227,000; the Breton, 967,000; the Basque, 108,000; forming a total 34,262,000 souls.

Letters from France arrived yesterday morning, by which it appears that Bonaparte has refused to grant any more licences for the exportation of grain; but from what cause is not distinct explained

Dutch pa, s to the 10th, and Paris papers to the 7th inst- reached town yesterday, but their contents are unimpor-tant. The Turkish army is said to be 450,000 strong, of which number, after deducting garrisons, about 180,000 can be brought into the field.

A considerable number of Americans have been discharged from our ships of war in the West Indier, in obefience to orders from the Admiralty

We have received Dutch papers to the 11th inst. but their contents are not interesting. The only article in them that deserves to be mentioned, is a commercial decree, issued by king Louis, which, however, is not sufficiently important to render it necessary to insert he article in detail. Its principal cbject is to alter the line of demarkation, within which (with some exceptions) all magazines, depots, or warehouses of colonial productions, or English manufactures, were by a former decree prohibited, from 2000 rods to 5000 rods from the sea coast.

We have received French papers to the 11th, and Dutch to the 14th. They contain some long but uninteresting details of the arrival of Bonaparte and his empress a. Paris, and the programme of the fete to be given by the city of Paris to their imperial majesties. Screral other fetes are to follow, to be given by the war minister and other principal officers of government

Respecting the affairs of Spain, the Paris papers of the 10th inst contain the following article:

Paris, June 10. Letters from Bayonne, of the 3d inst. speak of the uninterrupted passage of treops through that town for Spain. mong these reinforcements are about 500 artillery men, who were immediately followed by a number of caissons, &c. 1 We daily expect the arrived of 8000 fusileers of the Imperial Guard, who are to proseed to Burgos, where they are to remain till further orders. The sharp shooters and chasseurs of the Imperial Guards begin to arrive here. They have been reviewed, and their fine willtary air and discipline excite the admiration of all who see them.

According to letters from Madrid, his Art, It The line of demarkation of majesty king Joseph will not remain long
