and Andreweds. Their majories did not retire until the end of the ballet. We could perceive in the boxes several illusrious personages : among whom were the king and queen of Westphalia, the duke of Wurtzburg, uncle of the empress, the Austrian and Prussian ambassadors, the prince arch-chancellor of the empirej &c

LYONS, May 23.
We expect the arrival here of marshal Augereau, the duke of Castiglione, who had resigned the command of the srmy of Cetalonia, in order to return to Paris. His successor, mershal Macdonald, has by this time, probably arrived in Gerons, where the head quarters of the 7th corps still are. General Lecombe St. Michael still helds the situation of governor of Barcelona, but will seen have another destination. That city is now in a more favorable situation than it was at the beginning of winter. All is quiet in the vicinity; the armed bands since their late defeats, have retired to the mountains, and the communication with the army in the field has been perfectly free since the reduction of Hostaltich. The scarcity of provisions, which was for some time very severely felt, has of course ceased. In the beginning of the present month, a number of vessels from the South of France arrived safe, with a large supply of artiflery, provicions and military stores.

VIENNA, June 1
We are very busy at present
in proparing our rain parts; 12,000 men from the garrison are employed in this task, but it will be the work of years The object is not so much to restore the fortifications to their former state, as to remove the immense quantities of rubbish, which are very inconvenient.

TO THE CURIOUS.

Lately imported in the achr Ariadne, cap-tuin Skinner, from the Gold Coust of

A beautiful living LEOPARD:

The proprietors do not wish to give a lengthy description of this animal, and shall leave it principally to these who view him.

The Leopard is in shape, nature and colour, very much live a Tiger, being spotted like that ereature, and is said to be engendered between a Lion and a Tiger.—Ilis face and cars are like a Li-on's.—He is of terrible aspect. His teeth are so slarp and strong, that he can bite iron asurder with them .- His claws are a good defence, being like his teeth, both so sharp and strong, that he fights with them -The colour of the upper part of his body is like whitish ak, the lower part of an ash colour. -He is covered with most beautiful spots, not two alike - He is very ravenous, hates and destroys all creatures he can muster; but is very submissive to his keeper, and cannot injure visitors.

To be seen at JOSEPH CLARK'S,

The preprietor of this very curious Shrep, would willingly give an exact description of it; but as the public are so often disappointed by a description of curiosities, far exceeding what they real ly are, the owner of this extiaordinary animal, will leave it to a generous public to determine, whether it is not one ofthe greatest natural curiosities ever imported into this country or not.

To be seen at the same place THE LIVING SLOTH,

(THE CNLY ONE IN AMPRICA ) Brought by Thomas Lancaster in the schooner Hope, capt Traverse, from Oroneka.

Of this singular animal there are two species, the one called the Unan, the other the At; the one having two claws upon each foot, and no tail, the other three claws upon each foot, and a small tail; this one is called the Unan "This wonderful animal bears some resemb lance to the Badger, the fur is extreme ly coarse and stragging, and in appearance resembles dried grass; the tail is scarcely perceivable, and the mouth extends from ear to ear; the feet and claws are longer than the legs, which are placed upon the body in such an extraordi nary direction, that a few paces is often the journey of a week: it is often obli-ged to go several days without any food, and we are informed that one remained suspended to a pole, across two beams, without any suitenance, for forty days."
