This merticine bears no analogy whatever In a negicine nears to analogy whatever to others of similar urie, so commonly complained of as operating with sintence; on the contrary, a particular excellence of this remerly is its being suited to every age and constitution. It contains nothing but what is perfectly innocent, and is mild in its operation that it cannot incure the most delicate. ration that it cannot injure the most delicate ration that it cannot injure the most decisite preparate lady, or the tenderest infant of a week old, should no worms exist in the bower, it will without pain or griping, cleans the storners and howels of whatever is foul the stomeon and bowels of whatever is four ir oftensive, and thereby prevent the pro-duction of worms and many fatal disorders. The brenges are particularly efficacions in curving off all gross humors and eruptions, interish and billous complaints, and are the lafest and mildest purgative that can be used as any occasion.

A dose of this medicine given occasionally A cose of this mentione given occasionally during the warm season, will effectually proven the "vomiting and purging of children," a dreaded disorder, which annually destroys thousands of the infant part of our citizens. It is bleewise the millest and most citizens. It is freewise the middest and first certain remedy, known, and has restored to health and strength a great number when in an advanced stage of this fatal complaint.— Particular and plain instructions are given or every part of the necessary treatment in

TAPE-WORM. Mr. Samuel Fuller, inn-keeper on the Hartford, ten miles from Baltimore, began about 12 months ago, to be grievously afflicted with a tape-worth, which increased fast in size and strength, so as to excite the most horrid sensations by its writhing motions and intolerable pains, recembling the gnawing and tearing of his bowels, which deprived bits of his necessary sleep, and caused ing and tearing at his nowers, which deprived him of his necessary sleep, and caused such dreadful apprehensions as cannot be described but by one in a similar situation; his appetite declined rapidly, and with that

h same gth so that he was unable to attend to any business; when he heard of same ex-cellent cures purformed by Hamilton's Worm Lozenges, he took a large dose, which brought away dost 4 yards (now in possession of H. Lea); but 2 renewal of his pains soon convinced him that this morstrous repetitional account to the convenience of the control soon convinced him that this monstrous reptile had recontred its first vigour. Application was made for more of the medicine, with advice, from which resulted the total expulsion of his fermidable enemy, in several pieces, which he supposed to be six or eight yards made. A few weeks have since clapsed, and Mg. Fuller is now in perfect health. The above facts are well known to a numerous circle of his neighbors, and he himself will gratify any who may wish to make further inquiries on the subject.

Alhough Hamilton's Worm Lozenges produce such powerful effects, when necessary, yet they are perfectly innocent and mild in their operation on the human tody, even when taken in large doses as Mr. Fuller will testify. Their peculiar midness is abundantly evident in the following cures of infants.

infants.

Letter from Mr. Henry Ackerman, brick-layer, in Magazine-street, near Broadway,

It would be ungrateful were I to withhold my testimony in favor of Hamilton's Worm destroying Lozenters. I had been between 5 and 6 years past much indisposed, and latterly often tormented with severe griping and pains in the bowels, troubled with offensive pains in the bowels, troubled with offensive preath, with violent feverish fits, and other obvious symptoms of worms; but frequently hearing your Worm Lozenges recommend-ed in cases similar to mine, I determined on a trial of them, as my last resource. The first evacuated twelve or thirteen tect of a tape worm, two other doses were taken, which brought away a quantity of matter brokes like rhins and pieces of worms. I suppose the tape worm, voided at different times, must in the whole have exceeded 40 feet. The almost recedible benefit I resided from this recticing induced me to ever the amost medicine, induced me to give a dose to a child of mine who was jung and sichly; it produced the same good effect in this instance, expelled a worm of a different kind, from place to twelve inches long, and at the same time restoring a good extending this. state of healting
