COMMERCIAL INTELLIGENCE. An obliging friend bas communicated to us the following information from an intimate friend and correspondent

in England, whose veracity is unquestionable. Extract of a letter from Liverpool, dated 13th July, 1810.

" On our detour from London hither (prefering this route to that of Holyhead) we had good opportunity of viewing, as well as hearing how the wheat crops turned out. On our way through Ox-ford, Gloucester, Worcester, Birming-ham, Derby and Manchester, (the finest wheat counties), we had frequent views of the wheat fields, some cut, and others reaping-and from all we could see and hear, the present crop will not, generally taken, be more than half a crop It was best about Gloucester and Worcester, and thinner as you went north-

" I saw very few, if any fields better than wheat is generally produced in Frederick, Washington, or Montgomery county, although I guess their wheats are heavier. The markets are gradual ly, though slowly rising since the exportation is denied from France, but great supplies are expected from the Bal ic.— Tobbaccos, especially coarse Potomacks, quite a drug

In addition to the foregoing, the letter contained some advice of a delicate na ture, cautioning he gentleman to beware of consigning tobacco. &c to such and and such persons, many of whom had become bankrupts; - and others with whom they were connected, were expected to stop payment]
