in favour of a medicine than columns of pompres ealogy founded on mere assertion could do.

It is not indeed presumptuously proposed as an imalified cure, but the inventor has every possible reason that can result from extensive experience, for believing that a close of these pills, taken once every two weeks, during the prevalence of our billoss tevers, will prove an infallible preventative—not further, that in the earlier stages of those diseases, their use will very generally succeed in restoring health, and frequently in cases esteemed desperate, and beyond the power of common remedies.

in cases exteemed desperate, and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by all persons in every situation, and of every ago.

They are excellently a lapted to carry oil supertinous bite, and prevent its morbid secretions—to restore and amend the appetite—produce a free perspiration, and thereby prevent colds, which are often of fatal consequences. They are celebrated for removing hanitual costineness—sinkness at the stomach and heat other and oright to be taken by all persons on a change of climate.

They have been found remarkably efficacious in preventing and curing disorders attendant on long voyages, and should be procured, and carefully preserved for use by every seanish.
