My pp) nents, gentlemen, profess the creeds of Liberty or Death, and No Submission .-These are proper sentiments I dmire them; but, when the Cammodore pramises so much, you enght to judge how far he can perform; I confess I never could carry every measure I proposed; Ic uld not govern congress; nor can be. -If he succeed in one meas re out of twenty, he may recken himself fortu nate; but he will find himself a mercypher in congress where there are a hundred and forty members each as s'ubborn and tenacious of his opinion -s he commodore can be of his. The commodore has told you a great deal about submission; this is the etly crime of which I am accused. It is unfounded, gentlemen.- I never submitted; it is incompatible with the maxims which have governed my life; it is not my character to submit to important wreng in private life, and I will never submit in public. I suppor ed it in every stage of its tor go as until the sena e struck out its prubbliory clauses, and made it a submission bill indeed, then I vote, rgainstit. This is the very reverse of what has been proclaimed to you. That bill would have excluted from our parts all the ships armed and unarmed of England and France; it would have confired the carrying of our produce to our own ships; a would have encouraged the industry of our shipbuilders and mechanics and it would have been a protest against he aggres. tions of the boiling contact. (Some symptoms of dissect from these assertions were minifested by the commodore, but we were too remote to comprehend or hear)

Gantlemen, there were many remarks which my niemoty does not enable me to notice, as I am not much practized in public speaking. You will make ellowance for cir umstarces. But, it is not necessary, perhaps, to detain you longer. What more need be said? Is it on my strong ground, among my hier d. of the 7th and 8th wards, that I mus defend cryself gainst the charge of submission? Y'u are not su mission men, and I expact the evide ce of your confidence on the first Monday in Octaber.

Other remarks were made by Mr.

McKim ch is the grounds on which the different can lidates stood; he had no idea that, if there were no law, the city would attempt to engress both the re-presentatives of the district, nor would the county conceive so u generous a scheme against the city. He stood for the city, and if he had not the greatest poll in the city, he would not consider lamself elected.

Mr Litt'e followed in a short but spirited and apprepriate addr es, which was well received; should we be able to recellect its principal points, we shall give them tomerrow. When he coacluded, we left the meeting. Mr. Moore was then on the restum.

It is wisely observed, by an excellent writer in the Statesman, that if the work of redressing grievances originate with the party who hold the reins of the Butish government, England may have reform; but, if it corne co in the opposite quarter, she must experience rebell on or revolution.
