THIS Medicine has, for ten years past, heen attended with a degree of success highly grateful to the inventor's feelings, in several parts of the West-Indies, and the southern of the United States, particularly in Baltimore, Petersburg, Richmond, Moifolk, Edenton, Wilmington, Charleston and Savannah. The testimony of a number of persons in each of the above places has been adduced, who have reason to believe that a timely use of this salutary remedy has, under Providence, preserved their lives when in the most alarming circumstances.

Facts of this conclusive nature, speak more in favour of a medicine than columns of pompous eulogy founded on more assertion

pompous eulogy founded on more assertion

could do.

It is not indeed presumptuously proposed as an infailible cure, but the inventor has every possible reason that can result from extensive experience, for believing that a dose of these pills, taken once every two weeks, during the prevalence of our bilious fevers, will prove an infallible preventative—and further, that in the earlier stages of those diseases, their use will very generally succeed in restoring itself, and frequently in cases exteemed desperate, and beyond the power of common remedies.

The operation of these pills is perfectly mild, so as to be used with safety by all persons in every situation, and of every age.

They are excellently adapted to earry off superfluous bile, and prevent its morbid secretions—to restore and amend the appetite—produce a free perspiration, and thesely prevent colds, which are often of fatal consequences. A dose never fails to remove a cold, if taken on its first appearance. They are celebrated for temoving habitual costiveness—sickness at the stomach and head ache—and ought to be taken by all persons on a charge of counter. could do. It is not indeed presumptuously proposed

are celebrated by all persons at the stomach and head ache—and ought to be taken by all persons on a change of crimate.

They have been round romarkably efficacious in preventing and curing disorders attendant on long voyages, and should be procured, and carolully preserved for use by every scaman.

Certificate of Mr. William Devenney.

During the last nine years, I have been in the habit of using Halm's Anti-Bilious Fills, prepared by the late Mr. Lee, whenever colds, head-aches or coctiveness lave rendered medicine necessary; in there cases a single dose has uniformly removed my head-ache, and has generally been found anticient to remove every symptom of cold, if taken on its first appearance. Induced by the benefit received, I have for many years past recommended them to many of my friends, and I have the pleasure to inform you, they and I have the pleasure to inform you, they have invariably succeeded, in removing the

This medicine bears no analogy whatever to others of similar title, so commonly complained of as operating with violence; on the contrary, a particular excellence of this remedy is its being suited to every age and constitution. It contains nothing but what is perfectly innocent, and is mild in its operation that it cannot injure the most delicate pregnant lady, or the tenderest infant of a week old, should no worms exist in the body, but will, without pain or griping, cleanse the stomach and bowels of whatever is foul or offensive, and thereby prevent the production of worms and menu fatal disorders. TAPE-WORM. Mr. Samuel Fuller, inn-hoeper on the Hart-ford, ten miles from Baltimore, hegan about 12 months ago, to be pricrously afflicted with a tape-worm, which increased fest in size and strength, so as to excite the most horred rentations by its writing motions and incolorable pains, resembling the graw-ing and teating of his bowels, which depriv-ed him of his necessary sleep, and coursed him of his necessary sleep, and caused en nim of his necessary steep, and cause with dreadful apprehensions as example to described but by one in a similar situation; his appetite declined rapidly, and with that his arrength, so that he was unable to attend his arrength so that he had a read of some over to any business; when he teard of some ex-Cellent cores performed by Hamilton's Worm Lozeness, he took a large dose, which brought away about a yards (now in possession of H. Lee); but a renewal of his pains sion of H. Lee); but a renewat or his pairs soon convinced him that this monatrous reptile had recovered its first vigour. Application was made for more of the medicine, with advice, from which resulted the tota expulsion of his formidable enemy, in several pieces, which he supposed to be six or eight yards users. A few mocks have since

chaped, and Mr. Fuller a now in price beath. The slove facts are well income to a numericus circle of his neighbors, and he himself will gratify any who may wish to make further inquiries on the subject.

Although Hamilton's Worm Lozenges produce such powerful clibers, when neversary, yet they are perfectly innecent and mild in their operation on the human body, even when taken in large doses as Mr. Fuller will testify. Their peculiar mildness is abundently evident in the following cures of infants.

Letter from Mr. Henry Ackerman, brick-layer, in Magazine-street, near Broadway, New-York.

It would be ungrateful were I to withhold my testimony in layer of Hamilton's Worm destroying Lozenges. I had been between 5 and 6 years past much indisposed, and latterly often tormented with severe griping and pains in the bowels, troubled with oftensive breath, with vio cut (everish fits, and other obvious symptoms of worms; but frequently hearing your Worm Lozenges recommended in cases similar to mine, I determined on a trial of them, as my last resource. The first evacuated twelve or thirteen feet of a tape worm, two other doses were taken, which brought away a quantity of matter broken like skins and pieces of worms. I suppose the tape worm, voided at different thates, must in the whole have exceeded 60 feet. The aimost incredible benefit I received from this medicine, induced me to give a dose to a child of mine who was pinfeet. The aimost incredible benefit I re-ceived from this medicine, induced me to give a dose to a child of mine who was pin-ing and sickly; it produced the same good effect in this instance, expelled a worm of a different kind, from nine to twelve inches long, and at the same time restoring a good state of health.
