The report comes from speculators, who have purchased the crops from the farmers at a low price, with the view of selling at famme rates, as the whole crop will not furnish nine months' supp ly.

Grain crops in Europe are, on the whole, less promising now than some two or three weeks back. In England complaint is made of the tack of rains, from which the wheat is suffering, while the sowing of certain root crops has to be procrastinated. From the continent the reports are more favorable, as far as respects the weather; but the Polish war is clearly confusing everything. In view of a probable dispute between this country and Great Britain, a powerful speculative movement in breadsiffs sprang up along the Baltic coast.
