REASONS WHY THE MADE AT WALTHAM, MASS.

IS THE DEST.

It is made on the best priaciple. Its frame is composed of solid plates no jar can interfere with the harmony of its working and no sudden shock can damage its machinery. Every piece is made and finished by machinery (itself famous for its novelty, as well as for effectiveness) and is 2 therefore properly made. The watch is what all mechanism should be-Accurate, simple. strong and economical. Except some high grades, too costly for general use, foreign watches are chieffly made by women and boys. Such watches are composed of several hundred pieces, screwed and rivited together, and require constant repairs to keep them in any kind of order. Ali persons who have carried "ancres," "lepines" and "English Patent Levers," are perfectly wellaware of the truth of this state-

At the begining of our enterprise, more than ten years ago, it was our first object to make a thorough good low-priced watch for the million, to take the place of these foreign impositionsthe refuse of foreign factories-which were en irely unsaleable at home and perfectly worthless every where.

How well we have accomplished this may be 2 tunderstood from the fact, that after so many years of public trial, we now make more than half of all the watches sold in the United States, and that no others have ever given such universal satisfaction. While this department of our business is continued with increased facilties for perfect work, we are at present engaged in the manufacture of watches of the very high est grade known to Chrono metry, unequalled by anything hitherto made by ourselves, and unsurpassed by anything made in the world .-For this purpose we have the amplest facilities. · We have erected an addition to our main buildings expressly for this branch of our business. and have filled it with the best workmen in our service. New machines and appliances have been constructed, which perform their work with consummate delicacy and exactness. The choicest and most approved materials only are used and we challenge comparison between this grade of our work and the finest imported chronometers. We do not pretend to sell our watches, for less money than foreign watches, but we do assert without fear of contradiction that for the same money our product is incomparably superor. All our watches of whatever grade, are in ly warranted and his warrentee is good at all times against us or our agents in all parts of the

CAUTION .- The public are cautioned to buy only of respectable dealers. All persons selling counterleits will be presented. ROBBINS & APPLETON.
