Watch, Mother.

touch every chord of the human heart :]

Mother, watch the little feet, Climbing o'er the garden walk, Bounding through the busy street, Ranging cellar, shed and hall. Never count the moments lost, Never count the time or cost; Laughing, bustling all the day,

Guide them, mother, while you may. Mother, watch the little hand Picking berries by the way, Making houses in the sand, Tossing up the fragrant hay. Never dare the question ask, "Why to me the weary task ?" These same little bands may prove Messengers of Light and Love.

Mother, watch the little tongue, Prattling eloquent and wild; What is said and what is sung By the joyous, happy child. Catch the word while yet unspoken, Stop the vow before 'tis broken; This same tougue may yet proclaim Blessings in a Saviour's name.

Mother, watch the little heart, Beating soft and warm for you; Wholesome lessons now impart; Keep, O! keep that young heart true. Still extracting every weed, Sowing good and precious seed, Harvest rich you then may see, Ripen for eternity.

TO MY HUSBAND.

Come, darling, to your cottage home; I long to hear your welcome step, I cannot linger here alone-I feel like one bereft.

No smile lights up our tottage now, No glad voice greets my ear, But sadness restsupon my brow, Because you are not bere.

I tried to hide the trembling tear That fell upon my cheek, As I turned the parting word to hear, Lest you would deem me week. But in my heart there stole a thought

Should death doom us to part;

My grief would be a page untold,

This world to me would be as naught, I'd own a sad crushed heart. No wealth of land or glittering gold Could buy from me a smlle;

Penned by the tear of sorrow's child. But quick the vision passed away, As low I bowed in prayer; I knew that God all harm could stay, And keep you neath his care.

But weary, long, will pass each hour, That keeps you from our home; Hope has not the soothing power Your absence to atone. I sat and watched the sun go down,

I'm watching midnight's darkest frown, And sigh because alone. Alone! Ob, no, I'm not alone! In heart I know you're here; Your arm is fondly 'round me thrown,

And viewed the star-decked throne-

ADVENTURE WITH WOLVES.

And hushed each falling tear.

When I had traveled about an hour on my backward journey, I came to the place where I had first fired at the moose; here were my pocket compass and sundry other articles which in the excitement of reloading had been pulled from my pocket and forgotten. I had anticipated too much from the compass, for, as it soon appeared, I had been going directly from home all day. Weary and worn I plooded along till the sun had set and the moon risen. The moon brought light which gladdened my sight, but it also brought sounds which saddened my heart, for I had been a resident of the wilderness long enough to distinguish the voice of animales of the woods, and could tell them all, from the screech of a cat-owl to the snarl of the Indian devil; and I knew that the distant nowls which struck faintly on the ear, could only come from hungry woives. I quickened my pace. spite of the pain it caused me. Another hour passed away, during which time the howls of the blood thursty brutes came nearer and nearer, until the poor dogs actually quaked with fear. I almost torgot my own peril as I remembered that theirs was much greater, since I might es-

cape by climbing, while they could not. There was no doubt that the wolves "meant us," for they were coming up on all sides; howling so fiercely as to render it certain that we should be attacked within the hour. I plodded along, however, until I could hear them snorting in anticipation of their tender morsel, and then climed a large hemlock tree, the branches of which came down to within ten fret of the ground. With the greatest difficulty I took my rifle up with me, determined to protect the dogs as long as possible. Their cries were truly heart rendering, as they stood with their forepaws against the tree and looked up as it imploring the aid I could not give; and I was obliged to draw my sleeves across my eyes to

clear the sight. I had not been up the tree many minutes ere the first wolf made his appearance, about twelve yards distant, where, squatting upon his haunches, and throwing back his head, he gave vent to one of the most ferocious yells I ever heard. It seemed to chill my blood ten degrees, and caused the dogs to whine still more pititully .-I could stand their appeal no longer, but raistog my ritle to my shoulder, fired just as the monster was raising his head for another signal howl. The shot was a good one, for the wolf sank down and in less than a minute straightlened out his paws and was dead. I reloaded with all haste; but imagine my feelings when I tound my cap-box missing. I began to take out the articles of food: They were cold and frozen, all but one little morsel of something done up in a smaller paper. "It must be cheese," I mused. But a beiter treat than this was in store for me, for behold instead of cheese-matenes!
