# PACIFIC GUANO COMPANY-CAPICAL \$1,000,000.

terests, is to use all its resources to furnish the best possible products that its unequaled facilities can brings to the markets.

interests are such as in the nature of things furnish the surest guarantee of the continued excellence of was all the difference imaginable in favor of Pacific. It makes their Fertilizer, and entitles the Company to the grow well where it is applied. I never want to use Peruvian highest claims to public confidence.

the permanent investment of large capital; founded upon a solid basis; the operations of which are managed by men of the highest mercantile standing; the products of which are adapted to the promotion of the most important of all branches of industry; we think we may say, it will be conceded, that a Company such as this, sustains no unimportant relation to the agricultural interests of the country.

Note.-It is necessary for us to note the fact, that in consequence of the reputation acquired by the Soluble Pacific Guano, as brought into market by this Company, the same name has been given to Fertilizers of totally different character and quality, for which the Pacific Guano Company is in no way responsible, and it is not improbable some have been deceived. Hence, it is necessary for us to caution consumers to see to it that they procure the genuine product of this Company, the evidence of which is the names of the undersigned, branded on each bag, as agents for the Company, otherwise the article is not genuinc.

JOHN S. REESE & CO.,

General Agents for the Pacific Guano Company,

BALTIMORE, MD.

- Truth, like justice, is not created by human agency; it is the subject of discovery and revelation to the human understanding. . Truth is discovered by two methods, viz: first, by rational deductions from known facts, and secondly, by experience. The results of these two methods, constitute evidence. The revelation of truth thus discovered, is testimony.

Any proposition, the truth of which is sustained by evidence resulting from rational deductions from known facts, is entitled to the credence of mankind, unless the deductions are shown to be erroneous, by evidence of a superior character. When to this sort of evidence is added the concurrent testimony of a large number of disinterested witnesses, as the result of experience, there can remain no doubt as to the absolute truth of the thing testified to. We have beretofore repeatedly given to the public

our deductions as to the truth of the proposition, that the elements of fertility, as they are prepared and combined in Soluble Pacific Guano, constitute a fertilizer of the highest excellence. We have also, from season to season, laid before the public the testimony of a large number of disinterested, competent witnesses, the results of separate individual experience, as pdditional evidence to the truth of our proposition. results. The clover sown this spring on the wheat land where Without repeating our deductions, we now present an array of testimony, in the form of evidence resulting from recent experience, which confirms all, and more than all, we have heretofore claimed. "TWO OR THREE witnesses" are usually assumed to be sufficient to establish truth; here we give many times two or three; hence, if it is not true that this Guano possesses the highest excellence as a concentrated fertilizer, human testimony and rational deductions combined, no longer constitute evidence of truth.

We invite the careful attention of all interested in the subject, to the following voluntary, disinterested testimony, in the form of

# Correspondence.

## FROM VIRGINIA.

CHARLOTTE Co., VA., July 9th, 1870. Messrs. Allison & Addison, Agents Soluble Pacific Guano: GENTLEMEN-Anything I may say of my own personal knowledge cannot have the effect, to any great extent, of adding to or detracting from the same of this celebrated Fertilizer. I say celebrated, because some of the most successful and largest agriculturists around me who have been using it for some time, are using it now, and after a thorough test side by side with other fertilizers of a higher cost, they contine their praises of the "Soluble Pacific Guano." In a conversation with one of my neighbors yesterday, who, by the way, is one of the most successful farmers in this whole section of country, he showed me a piece of land which three years ago, with the best season, would not have made two and a-half (2%) barrels of corn to the acre. In the falls of 1867 and 1868 he seeded it in wheat, following with clover, using Pacific Guano at the rate of 200 lbs. to the acre. This year it is in a fine stand of clover, and he considers it in fine heart now for the growing of any crop. He also showed me some tobacco, now nearly in the top. One part of the lot manured with Soluble Pacific Guano, the other piece with a fertilizer of higher cost. If any difference naturally in the land, he says, that where the higher-priced fertilizer is has the advantage. The tobacco where the Soluble Pacific Guano was put is undoubtedly the best now; what the result will be remains to be seen at the maturity of crop.

As to my own experience with your fertilizer, I think it but proper to state that I am just in the rudiments of the science of Messrs. Allison & Addison, Agents Pacific Guano Company: farming, and that the seeding of a wheat crop last fall was the beginning of my operations. I used the Pacific Guano upon a clover fallow, at about the rate of 200 lbs. to the acre. I am confidently expecting a yield of from 15 to 18 bushels to the acre seeded. have a fine stand of clover, although I did not sow any. I am, very respectfully, &c, JNO. WM. COLLINS.

PRINCE EDWARD COUNTY, VA., July 12th, 1870. Messers. Allison de Addison, Agents Pacific Guano Company: GENTLEMEN-I am very much pleased with the effects of the Pacific Guano, I got from you last fall, on wheat and tobacco. had a bag of Peruvian Guano, which was applied to a small strip of wheat, with Pacific on either side on like land. The Peruvian was put on much the heavier, by a raw hand; I saw no difference in the growth of the wheat; the whole crop was a very good one for this section; the stand of clover, if not perfect is almost so. I cut a very fine crop of clover last month from tobacco lots on which Pacific was applied year before I st. The tobacco was followed by wheat, on which no Guano was applied. One lot was remarkably fine; many of the stems measured 4 feet 10 inches. I Pacific to the Peruvian Guano that we have been getting since the suppose the average beight was 4 feet, and as thick as it could war, both as a crop producer and an improver of the soil. stand. This lot has been in cultivation seven years successively, to wit: 1st year, corn; 2d, cats; 3d, 4th and 5th, tobacco; 6th, wheat; 7th, clover. It has not had a particle of fertilizer except Pacific Guano, which was applied only on the three crops of tobacco. The last crop of tobacco was the best of the three; it was large and uniform throughout, nearly every plant ripened at the same time. I have farmed in the immediate vicinity of Richmond, and have not seen a better piece of clover than that referred to.

Yours, traly,

(Signed.) P. H. ANDERSON.

FLUVANNA Co., VA , July 11, 1970. Messrs. Allison & Addison, Agents Pacific Guano Company: GENTLEMEN-I take pleasure in saying I am very well satisfied with Pacific Guano "I used it on my wheat last fall, and made a fine crop. I am using it now on corn and tobacco. I have not used it long enough to state correctly its effects on grass on follow ing crops, but am satisfied it is very good. Very respectfully,

D. W. BOWLES.

HANOVER COUNTY, YA. JESO. 9 Mesers. Allison & Addison, Agents Pacific Guano Company: I prefer it to any fertilizer I have ever used. I used it on my wheat last fall; I have the best crop, on the land, I have ever Thirdly-That its character, copilal and material made. I used it on tobacce two years ago; I made a good I have used it on com, wide by side with Peruvian Guano. There fine heads and large grains of wheat. Clover and other grasses again. I am improving my farm. If a man wants to " put his farm through " he can do it with Peruvian very soon. A proof of . Fourthly-That a Company like this, involving it is, a neighbor uses Peruvian, I the Pacific; my farm is improve ing a great deal faster than his.

Yours, respectfully, M. C. CRENSHAW. (Signed.) CHARLOTTE Co., VA., July 4th, 1870.

Messre. Allison & Addison, Agents Pacific Guano Company, Richmond: GENTLEMEN-I have been using Pacific Guane on my wheat | izer so long as we can get that. crops for the last four years, and would like to continue to use it as it is decidedly the most trustworthy of all the manures I have used. But I am offered another manure at less money on time. much prefer the Pacific because I can trust it, but the difference in cost is tempting. Will you let me have your views?

C. B. VAUGHAN. (Signed.) BUCKINGHAM Co., July 8, 1870.

Hoping to receive a prompt reply, I am, gentlemen, yours, &c.

Messre. Allison & Addison, Agents Pacific Guano Company, Richmond: DEAR BIRS-I have used Pacific Guano for four years, and I am well pleased with it. I have used it on corm, wheat and tobacto and I believe it is the cheapest and best fertilizer we farmers can use. I used it on wheat last fall, side by side with Peruvian. equal quantity per acre. The reapers, when cutting, could not tell when they got where the Fernvian was used, as there was no difference in the wheat. I expect to use nothing but the Pacific hereafter, as the grass and clover grows so much more abundant where it is used. I am fully satisfied that it is the best improver of any of the Guanos now in use. ROBT. H. JOHNSON. Respectfully yours,

GENTLEMEN-Yours of 4th inst. is received. In reply, say used the Pacific Guano side by side with Peruvian in the same field on my wheat two years in succession, and the yield and quality was fully equal to that made with Peruvian, and the clover and timothy following the Pacific better than that following the Peruvian. I have not used Pacific on tobacco until this year, Messers. Allison & Addison, Agents Pacific Guano Company: and cannot speak of its effects yet. Respectfully, L HERNDON.

Messrs. Allison & Addison. Agents Pacific Guano Company, Richmond: DEAR SIRS-I used Pacific and Peruvian Cuanos side by side on my wheat last fall, but failed to make any sign between the two and therefore I have been unable to see which is the best. I have beretofore considered it second to Peruvian, but now I think it equal to it for wheat. I am, very respectfully, your obedient servant, R. S. CAMPBELL

FLUTANNA Co, VA., July 9, 1870.

I use no fertilizer with more satisfactory results, inveriably, than the Pacific Guane, both as an Improver and for its effects on the crop to which it is applied. There is no firmer believer in the efficacy of Pacific Guano than

Your humble servant, N. R. JAMES, M. D. (Signed.) HANOTER Co., VA., July 5th, 1870. Messre. Allison & Addison, Agents Pacific Guino: The Pacific Guano I purchased of you last fall acted finely on wheat sown on common corn land, and came up fully to my expectations. I have not tried otherMertilizers sufficiently to get an idea of its comparative value. I like it so well that I intend using it again this fall. Respectfully,

J. F. CARPENTER (Signed.) CHARLOTTE Co., VA., July 11th, 18:0. Messers. Allison & Addison, Agents Pacific Guano Company: GENTLEMEN-I used one ton of Pacific Guano on wheat la: t tall, and while I think the Guano paid for itself, still the increased yield was not as great as I anticipated. The Cuano sent me was rather or me in 1867, which was then used on tobacco, with satisfactory the l'acific was applied seems to be doing well.

Respectfully yours, H. A. CARRINGTON. (Signed.) Guano hereafter sold will be fine and dry, and in admirable condition for drilling. A. & A.

HANOTER COUNTY, VA., July 8th, 1870. Messrs. Allison & Addison, Agents Pacific Guano Company: GENTLEMEN-My experience with fertilizers has not been very extensive in Virginia, but from past results I know of none that I would prefer to the l'acific Guano and l'lour of Bone. My wheat this season on which I used these fertilizers, obtained from you, was very fine, said to be the best in that immediate of continuing its use. the of my neighbors, Mr. Joseph E. Hughes, to whom I recom

mended the l'acific Guaro last fall, and who purchased through me, states that he never had finer wheat, and that he does not intend to resume the use of l'ervian Guano. He is an experienced and successful farmer, and I attach much weight to his judgment My clover is all o looking very fine. I have node ubt of the being permanent improvers. So long as the Pacific Guano retali its present standard. I would always use it in preference to Peru vian, and especially in view of their comparative cost.

Very res ectfully yours, IRA AYRES, JR. (Sig t.cd.) FLUTANNA, July 11th, 1870.

Messrs. Allison & Addison, Agen's Pacific Gurno: GENTLEMEN-I sowed l'acific and l'eruvian Guanos en the same up on account of the cool, wet fall. From early spring until hard ever had. vest I saw no difference in the cop except that where the Peruvian Guano was put, the wheat was a little taller. The crop would have been a fine one but for the rainy spell when the wheat was in bloom, which caused it to scab or open meshes. There was a fine crop of straw. The field of thirty acres was seeded in clover. Where the Pacific was used, the clover and grass s looking very fine. Where the Peruvian was need it does not look so well. I never used Pacific Guano before last fall. I used on the present crop of com, in the hill, at the rate of one hundred pounds to the acre, by the side of Feruvian and, ---- Super Phosphate, and at this time the corn is looking very fine. My neighbor used the Pacific Guano on tobacco last year. The crop was larger and earlier than where he used other fertilizers. From my observation the Pacific is equal to Peruvian Guano for wheat, and a much better improver for grass and all spring crops, as its action is not so rapid, and does not exhaust so soon. I am so well pleased with Pacific Gnano, I wish to use it on wheat the coming fall, and more of it than last year. Yours, &c., (Signed.) NATHANIEL W. DIGGS.

AMELIA Co., VA., July 7th, 1870. DEAR SIRS-I sowed Pacific Guano last fail on wheat, the land being poor corn land. It acted finely, and produced a good crop. its effects were visible carly in the spring. Clover and other vegetation where it was applied looks well. It gave perfect satisfaction. I applied it this spring on tobacco; it is growing off finely. I think it started better than it did last year, when I used Peruvian. Yours very respectfully,

(Signed.) JAMES CHAPPELL NOTIOWAY COUNTY, VA., July 6th, 1870. Messrs. Allison & Addison, Agents Pacific Guano Company: GENTLEMEN-The Pacific Guano I purchased of you, through Messrs. Taliaferro & Co., was tried on poor land, on the tobacco crop, but, owing to the severe drought of last summer, did not act ! at all. CUMBERRAND Co., VA , July 15th, 1870. Messrs. Allison & Addison, Agents Pacific Guane Company: ... GREELEMAN -- Jus Asst application of Pacific Guane was on cort last year. We applied it when we put the dirt to the corn; the result was all we could ask. We made a fine crop, not with stand-Ing the severe drought. We put at the rate of a handful to every crop. I used it this spring on tobacco; it sooks well at this time. ten mills, We sowed a part of the corn land in wheat, with an additional application of 75 for. Pacific Guane to the acre. The crop of wheat surpassed the corn crop. Before going further The crop of wheat surpassed the corn crop. Detection of Addison, Agents Pacific Guans Company.

I must say that three-quarters of the land, without fertilizer, Messre-Allison & Addison, Agents Pacific Guans Company.

Gentlemen—While my experience in the name Company. would have produced no crop at all.

cife Guane was applied to the co-n, with no further application, to say its effects upon my wheat crop was decidedly harbed and very thin land, produced a fine crop. We had some branch notices Me, both as regards yield and quality, and should tand on which no Guano was used. The oats were not so good as action be as favorable upon my growing crep of tobacco, where the country of th on thin, high land where Pacific had been applied to the corn. now promises well. I shall bel no heditaney in concepting We sowed no grass seed where Pacific Guano was used, but the value with the genuine Pernvian Guano. As to its effect upon we sowed no grass seed where Parine Guano was did not use grass, weed, clover, &c., following the wheat crop, I'm not prepared to sar, having so recently reaped my wheat Pacific Guano on tobacco last year, but used it altogether this. to say, having so recently reaped my wheat The crop at this time looks very puomising. We think so highly of Pacific Guano, we will use no other fertil-

In conclusion we will say, that we believe Pacific to be the Guane for the farmer. Yours, truly, FRAZIER & BRAZEAL (Signed,)

CEMBERLAND COUNTY, July 15, 1570. Messrs. Allison & Addison, Agents Pacific Guano Company: GENTLEMEN-I have been using Pacific Guano for two years, and, considering the success that has attended me, I feel no hesttancy whatever in saying it is the fine t fertilizer I have ever used. I recommend it to my friends, and think everyone will do well to use it. Notwithstanding the rainy spring my wheat crop was far better than I had any right to expect. The crop of clover following is a good one, and I am convinced, so far as my experi ence extends, it is a permanent improver. lam, very respectfully, yours, &c.,
R. C. TONEY.

BUCKINGRAM COUNTY, July 13th, 1870. Messrs. Allison & Addison, Agents Pacific Guano Company: GENTLEMEN-The effects of Pacific Guano, used by farmers in of it. this neighborhood, is very fine. It has acted finely on the wheat, and the clover is now looking very well indeed. We have used it several years ourselves, and prefer it to any we have ever used We sold a good deal of it last fall, and, as yet, have heard no complaint of it, but all speak of it in highest terms and intend to use it again this fall. We don't think a ton of Peruvian Guano has been used in this neighborhood for three years. Very respectfully, yours, &c.

WM. M. HALL & BRO. (Signed.) CHESTERFIELD COUNTY, July 15th, 1870.

GENTLENEN-I used Pacific Guano on wheat last fall, at the rate of 150 lbs. to the acre, on very poor corn land, which bid fair to make a good return until the spring rains set it, which caused the crop to be cut short, although it was as good as I could expect. also seeded the same land in clover, which is at this time looking very well. In the spring of 1869 I applied 100 lbs. Fer acre on my wheat, and at the same time seeded the land in clover. The clover at this time is from 6 inches to knee high, which is much better than I expected it to be. This spring I used it on corn, at the rate of one spoonful with an equal quantity of plaster in each hill, and must say that I never had a better prospect for a good crop. From its effects on grasses I am ferced to conclude that it is a good improver of the soil. Wishing I was able to use it more freely, I am yours, very respectally, (Signed.) A. T. MARTIN.

ALBEMARLE COUNTY, VA., July 9th, 1870. Messrs. Allison & Addison. Agents Pacific Guano Company: GENTLEMEN-It affords me pleasure to say that the combination of Pacific and Peruvian Guano, which we applied to our wheat, proved very satisfactory. I think the Pacific Guano specially adapted for obtaining a sure stand of grass, and for this purpose ! shall continue to use it.

Very respectfully and truly yours, JOSEPH WILMER. (Signed) SMITH'S MROADS, VA., July 14th, 1870.

Messrs. McIlvaine & Co., Petersburg. Va : This is to certify that I have used Pacific Guano for two years, and the results are most satisfactory, having used it side by side with Peruvian Guano, and the tobacco was far better where the Pacific was used; and the difference was perceptible in favor of the Pacific Guano on the wheat crop that followed. Being so well pleased with the Pacific I have bought it again this year. Respectfully, HENRY E. SMITH.

Sr. TANNANT, Mecklenburg County, Va., July 15th, 1870. Messrs. McIlvaine & Co.: I take pleasure in certifying to the worth of the Soluble Pacific wet, and I thought not so good an article as had been purchased Guano as a fertilizer for tobacco and wheat. I have used it for the last three years, and with the most satisfictory results. My first experiment was on wheat; it was sown on very poor corn land, and with 200 lbs of the Guano to the acre I realized more the show of wheat before and since harvest, exceeded my cakula than ten bushels to one seeded. 1869 I used it on tohacco; although tions. By the side of a popular Super Phosphate, Pacific Guand the season was exceedingly dry it acted finely; I used it on land showed itself infinitely the superior. The stand of clover is rethat had been turned out as too poor to cultivate in anything, and markably good for the land. But for the evil effect of the larg-This objection is now entirely removed, and all the Pacific with 300 lbs. to the acre made a very fair tobacco crop. Notwith- continued rains, I think the crops where Pacific Guane was und standing the drought this year (1870), with an application of 400 would have been unusually good. From the character of the fall lbs. to the acre, and the same kind of land, I have as fine prospect and that of this spring and early summer. I think the wheat cap for a good crop of tobacco as I ever saw. A great deal of my to in our portion of the State was greatly injured. bacco has leaves on it now more than a foot across, and it is not more than 6 or 8 leaves high. I would say, the wheat crop on the land that I used it on last year was very good, will, I think, make twenty bushels to the acre. I would use it in preference to Peruvian Guano at the same cost. Every man that used it in this see-, tion last year uses it again this year, and diclare their intentions Most respectfully,

WILLIAM H. JONES. St. TAMMANT, Mecklenburg County, Va., July 15, 1870.

Messrs. McIlvaine & Co, l'etersburg, Va : DEAR S:RS-This is to certify that I have used the Soluble the same land I think equally beneficial. I have used Pacific to Pacific Guano for the last two years with the most patisfactory and on corn, with satisfactory results, and nothing but the want results, it being, in my opinion, equal, if not superior, to any fer- of money in hand prevented us using it freely the last spore. tilizer made, for tobacco and wheat. I used it last year on tobacco on both corn and oats. So far as my experience enables me to on thin land, by the side of stable manure. 'The manure from my judge, I have not found it inferior to Feruvian Guano, and I conhorse stables was put on very heavily indeed, much more so than sider it a decided improver, and am cary waiting for moter to the farmers in this section generally apply it, but I was unable to send my orders to you, believing you will send me a good article. see that the crop of tobacco was any better from the stable manure than from the Guano, and I am certain that no one could detect the difference in the wheat crop. Several of my neighbors saw it and pronounced it one of the finest crops in the county. I am using it again this year, and am entirely satisfied with the results field, and on the same kind of land. The wheat was slow coming so far, it being the best prospect for a tobacco crop that I have

A. H. BRACEY.

New Kent County, Va., July 19, 1870. Messrs. Allison & Addison, Agents Pacific Guino Company. Gentlemen-It gives me pleasure to give you my testimony in favor of Pacific Guano, which I purchased of you last fall for my wheat crop. I consider it an active and permanent Fertilizer, and recommend it to all who are in want of such. It acted better on my root crop last fall than Peruvian Guano. All the grasses on wheat land show the effects of the Pacific at this time, being much denser and more laxuriant than where the Guano was not used. Yours, &c.,

(Signed.) JOSIAH HIGGENS. Louisa County, Va., July 18, 1570. Dear Sirs-I am very well pleased with the action of the Pacific cost, had better use your Guano. I don't want anything better.

Messrs. Allison & Addison, Agents Pacific Guano Company. Guano furnished me last fall. Where I used it I put a very small quantity to the acre, suppose about 100 pounds. I have not threshed my wheat yet, but think I will make 100 bushels from the use of half a ton of Guano. I did not sow any clover, but the grass and weeds are very good. I had a very fine crop of clover Mestrs. Reese & Co.: this year where I cut wheat last year, where Pacific Guano was used. I think clover or grass and weeds following the use of Pa. Guano. Its reputation about here is of the highest order, and if cife Guano, will improve the land. I expect to use it again this quite deserves it. I shall continue to use it in preference to any Very respectfully, WARNER M. NOEL.

Pittsylvania County, Va., July 17, 1570. Messrs. Allison & Addison, Agents Pacific Guano Company. Gentlemen-I raised a very fair crop of wheat with Pacific Gu. Messrs. John S. Reese & Co.: and bought of you last full-about as good as that raised with Peruvian. The l'acific was used on common land and the Peruvian on my tobacco lot. I didn't see any difference in view of the dif. to truck, and on that it can't be beat. Yours truly. ference in the land. I didn't sow any clover, but have a fine cover of weeds and grass. I am entirely satisfied with the Guano. Yours truly,

(Signed.) THOMAS SMITH. Caroline County, Va , July 18, 1870. Messrs. Allison & Addison, Agents Pacific Guano Company. Dear Sirs-I used Pacific Guano on wheat last fall with an equal result to that formerly obtained from Peruvian Guano in the growth of wheat and the cover on the land after harvesting. The grain, however, did not mature as well as when I used Feruvian Messrs, Reese & Co. ; Guano, but I think it probable that this was caused by the unfortunate weather just before harvest. Very respectfally,

WILLIAM GRAVATT.

. HOOLI GEODER R. F. GAINES Mesers. Allison & Aldsoon, Agente Pacific Guano Company Gentlemen-I used some few bags of Pacific Guano last fall remainder of my wheet crop, using Peruvian on the main port of the crop. I could not see any difference in the wheat field, tweep the Pacific and the Perurian. I raised a fine crop on portion of land on which it was used—the yield being about for one, on very poor land. The grass grows finely after it. Yours respectfully,

Prince Edward Co., Va , July 15, 1870. Messre. Allison & Addison. Agents Pacific Guano Company. Dear Sirs-I applied one hundred and fifty pounds Soluble P cific Guano to the acre on thin corn land last fall, and I think the yield vastly superior to any crop I have ever had on the lind am highly pleased with it, and prefer it to the Peruvian Guan I used a little of the Pacific Guano this year on my corn land ? the hill; the corn is looking very well. I wish I had used mor Very respectfully, (Signed.) R. L. BRICE.

Amelia County, Va., July 12th, 1870. Messrs. Ailison & Addison, A:ents Pacific Guano Compiny: Gentlemen-I sowed Pacific Guano, last fall, on thin corn land at the rate of 1:0 lbs. per acre. It made a fine crep. I think ! will pay me a profit : besides, the land scems to be in much bene condition where the Guano was used. I applied it on my present crop of tohacco; the crop is equal to that on which Peruval Guano and a popular tebacco fertilizer were used.

(Signed.) T. E. WHITWORTS. Fluvanna County, Va. July 10th, 1570. Messrs. Allison & Addison, Agents Pacific Guano Company: Dear Sirs-The result of the application of Pacific Guano wheat, last fall, was entirely satisfactory. I harvested, this year decidedly a better crop of wheat, with about the same quantity your Guano per acre, than I have done since the war with san quantity l'eruvian Guano. I have a very find stand ef cieve which looks vigorous and well, and, judging from its proappearance, I am of opinion your Guano is a very good permane I Lm, gentlemen, very respectfally,

JUDSON M. KENT. Fluranna County, Va., July 15, 1570. Messes. Allison & Addison, Agents Parine Guano Company. Gentlemen-From my experience with the use of the Pacific at Peruvian Guanos, I am fully convinced that the same amount money invested in l'acific Guano will produce a larger yield, at of better quality, than that made with Peruvian Guano, and th its action (i. e. the l'acific) on all kinds of grass or weeds growing after wheat is much better than that of Peruvian. I believe the Pacific Guano a good improver of land, but as a general thing this section of the country, do not think a sufficient quantity used to make a good yie'd of wheat, and add much to the value our lands. From 150 to 200 pounds to the acre, with from 75 100 of Plaster, is about the quantity used, whereas if 2 0 pour of Guano, and a proportionate quantity of Plaster was used to : acre, I think the yield of wheat would pay equally as well a our lands improve more rapidly. The crop of straw in this . tion is abundant, but the grain is deficient in quantity and qu ity, owing. I've no doubt, to the excessive rains in the early pa of this summer. Respectfully,

J. K. NOEL

Goochland County, Va., July 15, 1870. Messrs. Allison & Addison, Agents Pacific Guano Compan. Gentlemen-The Pacific Guano furnished me last fall came fully up to my expectations and your representations of it. It was used on thin land seeded late in wheat. In consequence of the unasually cold weather we had last October and November, the seed remained a long while in the ground, and was not up till winter, but the effects of the Guano were visible during the winter, and I am, gentlemen, very respectfully,

(Signed,)

Your eledient servant. WALTER D. LEAKE. (Signed.)

Charles City County, Va., July 7, 1-70. Messrs. Allison & Addison, Agents l'acific Guano Company. Dear Sirs-I used Pacific Guano last fall on wheat, at the rate of perhaps less than 100 pounds per acre, on land from which I had taken corn, and the crop, now shocked in the field, I consider a very good one. From a bed left without Guane, , think the rep doubled by its application. Its effects on the clover growing on I am truly yours,

A. H. FURGUSSON. (Signed,)

## FROM NEW JERSEY.

Hightstown, N. J. July, 1870.

Messrs. John S. Reese & Co: Gents .- My corn-field on which I used your Pacific Gusno, is the admiration of the whole neighborhood. I left a part of my richest land without anything in the hill, but from the very tail where I commenced with the Pacific Guano the corn is four times as large. It pays me well to use it. Yours tru'y. JOSHUA R. NORTON. Hightstown, July, 1870.

Messrs. John S. Reese & Co.: Dear Sirs-I used your Soluble Pacific Guano on my crops last year in competition with No. 1 Peruvian Guano, and consider that it beat the Peruvian at a much less cost. Farmers that wish to raise large crops at a comparatively small Yours respectfully, GEORGE WEST.

Hightstown, N. J , August, 1870. Gents.-I have doubled my corn crep by using your Pacife Yours truly, D. P. HUTCHINSON.

Hightstown, N. J., Jaly, 1970. Dear Sirs-I never saw anything to equal your Soluble Pacific Guano on cabbages My experience has, thus far, been control CHARLES II. PERRINE.

Hightstown, N. J., July, 1570. Sir-The Soluble Pacific Guano I bought of you works 1202 charm. Where I used it on my corn it is now four times as bear where I used other fertilizers Its character as a manure acces bere is first class. I shall use it again this fall. C. PEFFER. Yours truly,

Hightstown, N. J., July, 1873.

Gents .- Your Pacific Guano beats my best stable manure by side on my crops. I know its value as a fertilizer in compart son with others, and shall use it as a matter of dollars and const G. W. FIELDER Yours truly,

Rancocus, N. J., June, 1870. Messrs. John S. Reese & Co.: Gents.-Mr. Leeds wishes me to tell you what I think of your Pacific Guano. I think it is a first-rate article for wheat and por tatoes, and as long as its present standard is mantained, it pays well to use it. We are glad to have an article in our place that gives such universal satisfaction. Yours truly,

Rancocus, N. J., June, 15.0. Messrs. John S. Reese & Co .: Gents. - I have used most all kinds of Manures, Phesphates, & but after an unprejudiced trial, I find your Pacific Guano to N the best. My experience has been on wheat and cabbage. nounce it an article that cant be beat. Yours truly.
