

THURSDAY MORNING, FEE. 4. 1841.

take not, bring them immediately to par value.

perance societies we may be assured that the lishments of the same kind in our own state—and that hour "sweet sixteen." In the language of the blame fall upon their own shoulders. They exercise a powerful influence in society, "The first chapter contains a sketch of the his- be the man who places her in his garden. and where exerted for the reformation of those tory of this manufacture through its successive. It would take a ream of paper to record all the fail to be salutary.

sway." And since thy smiles confer happiness, ent ores of iron, according to their respective Last evening after I closed, the vote was taken or 60 tons, lying just above the Ann, also at an-What would be more likely to reform the young manufacturing purposes. reprobate, then to know that his inebriation rendered him contemptible to the fair sex? Let it fume among our fashionable loafers.

We have read the "Constitution of the Ballimore Female Temperance Association, No. 1." It is thoroughgoing and covers the whole ground. They will not use, sell nor give "inebriating) drink;" nor will they "receive the addresses of, nor encourage an intimacy (in every case in ference; and will, we hope, form the beginning made by him yesterday, after which the House Thieves Let Loose! The National Intelligible of A. Bartlett, had the boys released by the aid of A. Bartlett, had the boys released by the aid of A. Bartlett, had the boys released by the aid of A. Bartlett, had the boys released by the same of the usual expenses. Mr. Gamble (I cannot Mark that, ye Soaplocks, who think that girls can be wooed and won as easily as ye can toss off your bitters before breakfast. Here is nonintercourse with a vengeance; and should the damsels throughout the city follow suit, ruin or reformation will be the word among the beaux. Should this not produce reform, marriages will be few, and the legislature idle for the want of divorce cases.

The constitution has been signed by 128 ladies, married and single. Some one of the latter probably suggested the following provise to the 3d article: "Provided the language of this article be not so construed as to prohibit the transacting the necessary business of life with those who may violate the terms of this compact." Now as most girls consider marriage as the most "necessary business of life," have they not left "a loophole of retreat" in case of necessity? We fear that some lady of "a certain age" had that clause

TEMPERANCE. Never has this great cause been in such effectual progress as at the present been signally defeated. The pre-emption bill time. The subject is one of general conversation having passed the senate, has yet to be acted upin all parts of the city—meetings are being held on in the house. almost every night, and hundreds are found pledging themselves upon the honor of gentlemeh to drink no more of that liquid which dethrones reason, and causes man, brute-like, to trample down his own as well as his neighbor's rights. The great reformation is most palpably manifested in the person and deportment of many who frage without previous naturalization. This sughave lately become members. He who in com- gestion was scouted with proper indignation, nor mon parlance was once a loafer-a pensioner as it were upon the bounty of others-always consuming and never producing-penniless and without character, may now be seen genteelly clad, rising | by degrees to respectability, seeking employ. ment, being employed and carning for himself an honest living. This, reader, is beyond question! the inevitable result of temperance societies and ner's will have become a mockery, and our liberthese shinplasters in circulation, as the fractional nothing else. While, therefore, so much good ty an empty sound. can be produced in a little time, and while the means that cause it are so simple, have we not reason, as a moral, as a political, as a commercial and as a free people, to rejoice in the present prospects, and in the anticipation of a more transcendent result?

GENERAL HARRISON. This distinguished gentleman is slowly approaching the seat of government. Indeed his progress cannot be otherwise than at a snail's pace, as he is every where received with a flourish of trumpets, speeches and entertainments—and especially as he has to gratify the enthusiasm of the ladies, who are resolved to see, and be seen by, the general. The last advices left him at Pittsburg, where they had an | the denomination of five dollars. The object is

becoming respect, whether he belong to this or paper currency instead of specie. This will re- ton, while the latter was ploughing. There was ing up. Mr. Gamble (I connect paying the usual expenses. Mr. Gamble (I connect paying the usual expenses.)

In furtherance of this desirable object we would respectfully suggest that the legislature invite an- | Mynroe against the bill. nual reports from the manufacturing establishments of every description, and that the secretary of state be directed to condense these with a view to pub. lication. We should thus be furnished with important statistical information annually, and be enabled to ascertain, with a degree of precision at present unknown, the progressive improvement in the various branches of wealth. We cannot doubt that such statements would be readily furnished by the proprietors of works, and their practical utility is too obvious for dispute. The labor imposed on the secretary of state would be so inconsiderable as not to require additional compensation.

Public Lands. Our readers will not be sorhoun's proposition to cede the public lands has

Some of the most novel and extraordinary ideas have been broached during the present session of congress. Among them is that of Mr. Benton, (we believe,) not only to permit foreigners to enter the public lands for their own use, but to admit such foreigners to the right of sufwould it be sanctioned by any man of any party who had the slightest regard for the rights of American citizens, or felt the least interest for the welfare of the country. Whenever the period shall, have arrived when foreign influence can control the destiny of the Union by the The banks having resumed specie payments, means of illegal votes, our "star-spangled ban-
