IVER COMPLAINT. This disease is the A covered by a fixed obtuse pain in the right side under the short ribe, attended with heat, unrasinces about the pit of the «tomach;—there is in the right side also a distension—the patient loves his appetite and becomes sick and troubled with vomiting. The tongue becomes rough and black, count-nance changes to a pale or citron color, or yellow, like those afflicted with jaundice-difficulty of breathing, disturbed rest, attended with a dry cough, difficulty of laying on the left mde; the body becomes weak, and finally the disease toominates into another of a more serious nature, which in all probability is far beyond the power of human skill. Dr. Harlich's Compound Topic Strengthening and German Aperient Pills, if taken at the commencement of this disease, will check it, and by continuing the use of the Medicine a few weeks, a perfect CURB will be performed. Thousands can testify to the fact. 3Q-For sale by W. G. COOK, No. 3 N. Gay stress.
