The real patriots of both parties will indulge the pleasing hope, that the progress of the in-coming administration We confess that we have no gloomy forebodings, up so queer an opinion relative to the configura- ered and concurred in. or we believe that those who to-day assume power will admit no influence that can militate against the interests of their country. The new president possesses a vigorous and well-disciplined mind, with long experience in public affairs, and his patriotism is undoubted. That such a man, elevated by the free suffrages of his fellow citizens, to the highest office in their gift, should use the power thus conferred, to the prejudice of his country, is not to be suspected. Surrounded utmost confidence that all his measures will be old kitchin fire-place. It was a leetle dark and a dictated by wisdom, and have but one object, the common good. We do not look at him with the jaundiced eye of party, nor condemn him in advance for measures which may exist only in our own imagination. He is entitled, like his predecessor, to a fair trial; and if it shall be found that he has wantonly encroached upon the rights of the people, or sacrificed their interests, our voice shall not be withheld in his condemnation. This is the measure which we desire to have meted to all public men, without reference to their party appellation. A magnanimous adversary, however he may be disposed to strike, will never refuse to hear; and it is especially necessary in a republican government that there should be a generous forbearance towards those to whom is entrusted the guidance of public affairs. It is the right and the duty of the people to keep a vigilant | this country, that its financial condition is deeye upon their officers, and to be prompt to re- pendant upon the fluctuations of the money markcall them to their legitimate course upon the least | et in London. The association has not to complain if the aliment for the first measure, therefore, that will engage the attention of congress at the extra session, will probably be a revision of the tariff.

To-day will be held as a jubilee in Washington city. The banks and stores (we presume) will be closed, and the military, citizens and strangers murch in procession to the front of the Capital, where the inauguration is to take place. The day will be closed by two balls and an illumination. Altogether it will no doubt be a splendid spectacle—but we should be as well satisfied were there less parade.

Our proximity to the seat of government will cause thousands of our citizens to be present at the inanguration; and the whole number of visiters will be so great as to render it doubtful whether all can be accommodated. We understand that i in some cases from eight to ten persons have now
