ident, is held accountable for public misfortune France and the other half by England." and private woe --- not by the people generally, but by the party presses. But then, to counteret this injustice, he is lauded as infallible by his friends, who will hardly admit the agency of the Creaty in carrying on the works of nature. Thus we have the ebony and topaz of party. It is this **travagance of abuse and of praise, that destroys the real utility of parties, for it admits of no medinm; listens to no reason, and is blind to the dictates of justice. It is right to keep a watchful eye on milers, and to hold them to a strict accountability for the discharge of their duties; but, when editors "snarl and bite, and play the dog," instead of arti-o as trusty and faithful sentinels, they become more mischievous than benesicial, and blind the people when they should are, however, "old heads" connected with this give them light. With such men, party vigi- | paper, whose place could not easily be supplied lance degenerates into factious arrogance, and the freedom of the press into the grossest licentiousness. Mildness and moderation will accomplish more than harshness and violence. Men may be persuaded out of error; but call a man a scoundrel, and he will listen to no reasoning in justification of the epithet. If party editors would be just to their own characters, they would have more respect for those of other people.

since (says the Delaware Gazette,) an unfortu- fight," but throw us a tow-line, and take his sta- plated appropriation; for we believe that public steing either her means wasted in a profitient experinate misunderstanding occurred between two of | tion in our wake.
