

# BALTIMORE CLIPPER.

TUESDAY MORNING, MAY 25, 1841.

**PLEASED CONTEMPLATION.** A correspondent of the National Intelligencer has furnished that paper with a variety of interesting facts, extracted from the "Poly-cision," a weekly paper, published at Honolulu, in the Island of Oahu, one of the Sandwich Islands. When we look back at the discovery of these Islands, and compare the then condition of their inhabitants, with their present improved situation, we are astonished and gratified at the progress which has been made in civilization and its attendant enjoyments. This improvement is mainly attributable to the indefatigable labors of the missionaries, principally, we believe, from the United States. In the Island of Oahu, and no doubt in most of the other Islands of the group, regular and just laws have been substituted for the arbitrary customs which previously prevailed; and a man cannot now be punished, unless upon conviction on a fair trial by jury. A considerable trade is carried on with the port of Honolulu, from the United States and other places; and the exports from the Island in sandal wood, hides, goat skins, salt, tobacco, sugar, molasses, &c. &c. are on the increase. The Sandwich Islands seems destined to rise into importance.

The revolution in the religion and morals of the inhabitants of Australia, has been still more rapid and extensive; chiefly effected by missionaries from England. They were idolaters of the grossest character, some of them cannibals, and the sacrifice of infants by mothers, prevailed to a great extent. All this has been reformed, and the Christian religion has been generally adopted. Parts of the scriptures, prayers, &c. have been printed in the native languages; churches and missionary houses have been erected, and Divine service is regularly performed, by European and native preachers. The inhuman custom of putting prisoners to death and other barbarous practices are abolished, and law and order prevail. In short, in most of the Islands where the missionaries have operated, the whole character of the people has undergone a radical change for the better. European animals have been introduced, manufactures encouraged, and industry rewarded. The conversion from barbarism is thorough, for the superiority of the condition of the people, under their changed circumstances, has left no disposition to relapse into their former unhappy and degraded state.

Few persons are fully aware of the energetic beneficial effects which have resulted from missionary labors; for few take the trouble to read publications on the subject. We acknowledge that we had no conception of the extent of their services, until recently, when curiosity prompted us to look into the matter. They have effected wonders, not in the propagation of the Christian religion alone, but in civilizing hundreds of thousands of human beings, who were little superior to the most ferocious of wild beasts. They have spread light over the darkened intellect of the savage; and, by the introduction of printing will increase and perpetuate the knowledge of arts, science and the blessings of civilization.

**CORRUPTION.** In the reply made by the committee of stockholders who were appointed to investigate the affairs of the Bank of the United States, to the letters of Mr. Biddle, it is stated that upwards of one million of dollars has been expended for purposes which do not appear; and upon this fact various conjectures have been based. By some it is supposed that the money was applied as compensation for secret services performed by legislators, &c.; by others, that it was bestowed on political partisans—and it is broadly asserted in the Philadelphia Spirit of the Times, that large amounts went into the pockets of editors. Now the fact that a man is the editor or proprietor of a political journal, should not deprive him of the privileges enjoyed by others. He has the same right to borrow from a bank as another person; and is frequently more excusable, as a large portion of his pecuniary means lie scattered so as to prevent their being immediately available. If then, editors or proprietors be found among the list of borrowers in the books of the Bank of the United States, that isolated fact should not be quoted to their prejudice. But, if it be discovered that they have been accommodated without responsible security—or have unfairly or corruptly obtained aid from the bank, the transaction would be highly censurable, and should be exposed. The paper above mentioned asserts that editors in Baltimore have obtained large discounts from the bank, and states the fact in such a way as to lead to the inference that said editors have been guilty of impropriety. Now, as we feel somewhat interested in having the public mind disabused on this subject, and desire to relieve the editors of this city from the odium of the transaction charged against them, we have asked for the publication of the names of these editors in Baltimore to whom allusion is made; and we now reiterate the request that the Spirit of the Times will give the names, amounts, and every particular which he may think proper to publish. We ask this as an act of justice to those who are innocent. We know that our skirts are clear, and therefore challenge investigation. No person connected with this office ever had a transaction with the Bank of the United States of any description—and we hope that the editors of all the Baltimore papers will relieve themselves from the imputation attempted to be cast upon their characters.

**MURDERED ACCIDENT TO THE BRITANNIA.** A rumor prevailed in Boston, on Saturday, that the Britannia, which left Boston on the 15th inst. had struck on Sombra Ledge, at the entrance of Halifax harbor, on the 16th inst. in a thick fog, and was so much injured, as to be deemed unsafe to proceed on her voyage. The report came from St. John's, and was brought by General Swift, of New York. Mr. Stewart, a merchant, had just arrived at St. John's from Halifax, informed Gen. Swift, on board the North America, previous to her starting, that such a report was in general circulation at Halifax and not contradicted. It was said she struck on the Sombra Rocks, which caused her to leak, that she arrived safely at the wharf with difficulty, and it was thought it would be necessary to heave her down and examine her bottom. The Caledonia, it was said, was sent for to take her place. No letters or information of an authentic character have been received at the agency in Boston, nor any, so far as known, from any of the passengers, notwithstanding the regular mail for St. John did not leave Halifax until the morning after the Britannia is said to have arrived there.

**RECEIPTS OF THE CATHEDRAL FAIR.** We were informed last evening, upon the very best authority, that the receipts of the late Cathedral Fair, held at the Assembly Rooms, by the ladies of the Catholic church, amounted to SEVEN THOUSAND FIVE HUNDRED DOLLARS, clear of all expenses. For this benevolent enterprise our fair friends cannot but merit golden encomiums. It clearly demonstrates what can be done when the angels of charity apply their lily hands to the furtherance of a good cause.

We are further authorized to say that there are yet a number of choice articles left from the splendid collection exhibited at the fair, which the ladies will be happy in disposing of. We have no doubt but the proverbial liberality of our young gentlemen will prompt them to future deeds of generosity. We shall obey the injunction.

**NEW ARRANGEMENT OF THE MAILE.** The Eastern Mail arrived promptly yesterday morning at 7 o'clock. We welcome this arrangement with pleasure, and hope it will continue regularly.

The mail leaves New York at 5 p. m. of each day, reaches Philadelphia at about 11 p. m. and starts for Baltimore at 12. It reaches here say at 7, and is then despatched for the South by the 9 o'clock train of cars for Washington, and to the West, on and after Wednesday next, by the 5 o'clock train of cars for Frederick.

**PERILOUS FALL.** A young gentleman in the employ of Mr. Lambert Gittings, while engaged in the discharge of his duty, accidentally fell through the hatchway from the third story to the basement floor, and, strange to relate, was not so severely injured as might have been expected. Dr. Hinzte was immediately called in, who upon examination found that a concussion of the spine had been produced. Although this may disable him for a long time, yet it is thought his wounds are not dangerous.

**SUMMER COSTUME.** Since Sunday last, white pants, thin dresses, and summer costume has become peculiarly fashionable. Spring has in reality taken her throne, and seems already to have midsummer lingering upon her lap of glowing verdure. Yesterday was unquestionably and without dispute a melting day. We cannot close this paragraph without informing our various cotemporaries at a distance, that the ladies as they promenade Baltimore street looked irresistibly charming.

**UGLY BEHAVIOR.** Gerald Smith, a German, residing on Fell's Point, was arrested on Saturday night and imprisoned in the watch-house, charged with assaulting and beating his wife. In the morning the offender was brought before Justice Jones, and in default of security for his appearance at the City Court, committed to jail.

Another individual, named Zebulon Mitchell, was carried on Sunday night to the western lock-up, on a similar charge, but he was lucky enough to get off yesterday morning.

**ARREST ON SUSPICION.** Two colored men, Edward Curot and Alfred Johnson, were arrested late on Saturday evening, having in their possession four cloth coats, supposed to have been stolen, and which they were endeavoring to sell. They were both detained in the watch-house until morning, when they were discharged by Justice King.

**CAUTION.** Gerald was executed for murder at Eatwau, Alabama, on the 7th inst. He was calm, penitent, and resigned to his fate, saying that intoxication had caused his ruin.

James Egan and Andrew Duffy had a drinking match at Jullie's, Illinois, on the 4th inst.—he who got drunk first to pay the bill. Egan soon after went to bed, and left it a corpse.

**VELOCITY OF LIGHTNING.** Until within a few years it is said the velocity of the electric fluid has been a matter of conjecture merely. Late and ingenious experiments, however, have proved conclusively that electricity travels with a velocity nearly four times as great as that of light, being at the rate of 400,000 miles a second.

**THE STEAMBOAT FOX.** A short time since, says the Louisville Gazette, met with an accident in Green river, by running across a dam at the mouth of Muddy river. The chambermaid in endeavoring to jump ashore, fell in, was drawn under the boat and drowned.

**CONGRESSMEN.** The National Intelligencer of yesterday informs us that a number of members of Congress have arrived in the city of Washington, preparatory to the session which will commence on next Monday. Among them will be Mr. Calhoun, of Massachusetts; Mr. Trumbull, Mr. Boardman, and Mr. Osborne, of Connecticut; and Mr. Barton, of Virginia.

**SUN-SHADES.** Of all abominable contrivances with which the world has been pestered, we hold "sun-shades," as they are now used by the ladies, to be the most abominable.

Friend Times, we are astonished at your taste! Why, nothing can be more convenient and beautiful. Is there any thing so poetical as to see a pair of bright eyes peeping from underneath one of those dear, sweet, silken, charming little sun-shades, or if you please, sun-shades. While they protect the fair creatures from the tanning influence of the sun, they also serve another purpose, viz: to hide ugly faces. Again—you can tell when a damsel is three squares off whether she is pretty or not. If handsome, the dear little sun-shade is elevated so that the rosy cheek, the slabaster neck, the smiling countenance, &c. can be seen; if the reverse, it is held directly in front of the face, to hide (if allowed the expression) what nature has refused to paint with such delicate tints, and mould in such winning symmetry.

**ACCIDENT AT QUEBEC.** A dreadful accident happened at Quebec on the morning of the 17th inst. A large mass of Cape Diamond, with the wall from the Governor's garden gave way, to the base of the citadel, and buried under masses of stone and earth the houses in Champlain street, opposite the Custom House. About eighteen houses were destroyed, it is supposed. Thirteen dead bodies were taken from the ruins, and it is estimated that between twenty and thirty persons were in the houses.

**SHIPS LOST AT SEA.** The undermentioned ships have been lost at sea, and never since been heard of:—Dominica schooner, on passage to the West Indies, 1816. Arab, coast of Ireland, 1823. Delight, off the Mauritius, 1824. Alegerie, in the Mediterranean, 1826. Hearty packet, West Indies, 1827. Reading, coast of Africa, 1827. Acorn, coast of North America, 1828. Contest, coast of North America, 1828. Redpole packet, returning to England from the Brazils, 1828.—Ariel packet, coast of North America, in 1828 or 1829. Recruit packet, on passage from Halifax to England, 1832. Blenheim, 74 guns, in 1801, and Steamship President, on her passage from New York to Liverpool, 1841.—Boston Times.

**THE BOSTON ATLAS.** The property in this valuable establishment, established and owned, until his death, by Richard Haughton, Esq., has been purchased by Wm. Hayden and Thomas M. Brewer, by whom the paper will be hereafter conducted. Mr. Hayden is well known to us as a gentleman of high personal character and literary qualifications. Dr. Brewer had been assistant editor of the Atlas for two years, and in that capacity is very advantageously known.

**DROWNED.** It is stated in the Mobile Journal of the 17th inst. that the brig Miles Standish, Capt. Gorham, which cleared at that port on Friday last, for Norfolk, when about to discharge her pilot, lost a passenger overboard, (Mr. A. W. Carpenter,) who was drowned. The body was recovered and buried on shore, by the crew of the pilot boat Robert Bruce.

**A SWINDLER CAUGHT.** The rogue who forged a letter in the name of Captain Nichols, of the schooner Henry, at Philadelphia, the Boston Transcript says, has been caught in his endeavor to get the draft paid. He gave his name as John Gair, said he was the mate of the vessel, and was requested by Captain Nichols to call for the money. He failed of his object, and got himself into prison for his pains.

**MYSTERIOUS.** Some persons were cleaning out a cellar in Albany not long since, and discovered, buried two or three feet under the ground, the bones of two human beings. From the fact of one of the jaw bones having been broken, it was thought that the murderer's hands had been about.

**LITTLE RESPONSIBILITIES.** We are instructed to say upon authority extraordinary that His Imperial Majesty's Minister has been presented by his fair consort, Madame de Boliska, (late Miss Williams, of Washington city,) with two "little responsibilities"—noble specimens of love and union.

**STATE CONVENTIONS.** The friends of the administration will hold a convention in this city, on Thursday, the third of June, to nominate a candidate for Governor.

The opposition convention for the same purpose will be held on Thursday, the tenth of June.

**DISTURBANCE IN CHURCH.** Cato Harris, a colored man, entered a meeting house on Sunday night last, and behaved very rudely, for which he was taken to the watch house and properly reprimanded.

**FOUND DROWNED.** The body of a colored man was found on Sunday night floating in the water at the foot of Frederick street dock, by watchman Hiser, of the Middle District. An inquest was held over the body by Wm. T. Rice—verdict as per the facts.

**ARRESTED.** Nimrod Cronwell was arrested on Sunday evening by two of the Middle district watchmen, charged with attempting to rescue some prisoners from them which they had in charge. He was released by Justice King by giving security to appear at the Saturday court.

**CHILD FOUND.** The body of a white child, supposed to be about a week old, was found dead, yesterday morning, in the neighborhood of Kellar's mill, near the Beldiere Bridge. An inquest was held by Mr. Greenfield, the coroner, and verdict of the jury, death from some unknown cause.

**A SUNDAY SCHOOL CELEBRATION** took place in New York on Friday. In the procession were between three and four thousand scholars and teachers.

**A STRONG EXPRESSION.** A marine on board of one of our men-of-war, having been sentenced to three dozen lashes by a Court Martial, was asked after the punishment had been inflicted, how he felt upon receiving the first lash. His reply was, "he felt as if a cart load of lightning had been dumped on his bare back." We defy the English language to furnish a stronger expression.

**ALLEGED ROBBERY.** A man calling himself George Dunning, charged with breaking open a trunk and stealing therefrom \$61, the property of Eliza Eberle, was on Sunday evening arrested and confined in the Western District Watch-house. He was brought before Justice Stuart yesterday morning, and committed to jail for further examination.

**A YANKEE MINT.** There is in Connecticut a cent factory, where the real copper mint drops, bearing the stamp of the United States, in exact imitation to the legal coin, are made and sold 105 for a dollar; and if desired they will be casked up and delivered to any part of the Union, freight and cask free. Red banks taken for the same at par.

**ASSAULT.** Barney Manly, was yesterday arrested, by officers Davall and Myers, charged with assaulting and beating Isabella Devon. He was released on giving security to appear at Saturday's Court.

**EXTRAORDINARY LONGEVITY.** There is in the City of New York, a family composed of a father and eleven children, all of whom are now living. The father is 89 years of age, the oldest son 63, the youngest 46, and the aggregate ages of the whole is 729 years.

**STEAMBOAT.** The following particulars, says the New Orleans Picayune, are copied from memoranda, by the steamer Joan of Arc: "The steamer Ganges on Thursday last, at one o'clock, when opposite to Palmyra, took fire, and burnt to the water's edge. No lives lost, but boat and cargo entirely lost."

**THE CROPS.** The Charleston Courier of Friday says—We learn that the late cool weather and chilling winds have done very great injury to both the cotton and corn crops in St. Johns Berkeley. Some planters have had to plant cotton seed the fourth time.

**A PAPER PUBLISHED** in a town in Maine where there is but one house and a tavern besides the printing office, advertises for an apprentice, and very particularly observes that a lad from the country would be preferred. We should like to know that editor's idea of a big city.

**A YOUNG GIRL,** name unknown, was burned to death in the woods near Cleveland, Ohio, lately. She was an entire stranger, and had no doubt made a fire to warm herself by. Near her crisped body was found a tea spoon, marked L. W.

**THE BRITISH QUEEN,** which was to leave England on the 10th inst. as advertised, did not do so it appears. Advices by the Caledonia, say that her day of departure had not been fixed when the Caledonia left.

**WHISPERS IN HIGH LIFE.** Various whisperings have been in circulation for some time past relative to an affair which transpired up town, in which that very repulsive instrument, the \_\_\_\_\_, was used to some considerable effect.

**To take Ink out of Linen.** Take a piece of mould candle, or common candle melt down as well, melt it, and dip the spotted part of the linen into the melted tallow. It may then be washed, and the spots will disappear without injuring the linen.

**GENIUS OF POETRY.** The Milford Bard has again left the almshouse, whether he had repaired from necessity caused by his own unfortunate imprudence, and is about to take up his abode at the home of his fathers, in Milford, Delaware.

**GALENA, (ILL.) APRIL 30.** The Chippewa arrived here from St. Peter's yesterday. Contrary to the many rumors, all was quiet with the Indians. A Sioux had been killed by a soldier; but the latter was in iron and would be regularly tried. The troops at Fort Crawford (Prairie du Chien) had formed an encampment seventy miles above on Black river. We again express the conviction that with the present force and arrangements at the north, there is scarce a possibility that any serious difficulties can occur with the Indians.

**THE RELING PASSION.** A lady in one of our villages was lately thrown from a wagon and carried home senseless, with an ugly cut on one of her pretty cheeks. No sooner had the surgeon commenced his operation than animation returned, and opening her eyes she liped beseechingly, "Do, Doctor, sew it neatly." Of course the callant operator ran the stitches as close as a milliner working a waistband.

**NOTHING NEW UNDER THE SUN.** Alcibiades one day observed Pericles in a very pensive and melancholy mood, demanded the reason of it—Pericles told him that great sums of money had passed through his hands, and he knew not how to make up his account. "Continue, then," said Alcibiades, "to give no account at all."

**BLUE.** There is a lady in Connecticut so very pious, that, when detained from church, she makes it a regular practice to send her card.

**ANOTHER MURDER.** We learn that William Keyton, a citizen of Wilkinson county, Ga., was shot with a pistol, by one Samuel M. Pitman, in Irwinton, on the night of the 4th inst. and died on the 10th. The murderer has crept.

**A meeting** has been held at Toronto, U. C., to memorialize Lord Sydenham, to make Toronto the seat of government.

**A man** by the name of John Nelson was drowned in the Lafayette River, near New Orleans, on the 8th inst.

**A CARD.** The ladies of Baltimore are respectfully requested to call and examine the most splendid assortment of Ladies' BOOTS and SHOES ever offered in this city, received this day at the New York Fancy SHOESTORE, 150 Baltimore-st. m25-24

**VIGILANT FIRE COMPANY.** A Special Meeting of the Vigilant Fire Company will be held at the Engine House on THIS EVENING, 25th inst. at 8 o'clock, as business of importance will be submitted to the Company, it is hoped that the members will be punctual in attendance. By order, m25-11 L. D. DANIELS, Sec'y.

**MRS. GOVE** will Lecture THIS EVENING at the Vestry of the Universalist Church, Calvert street, and at Dr. Monk's Lecture Room, Ann street, Edin's Point, TO-MORROW EVENING. Gentlemen and Ladies are respectfully invited to attend. Subject, "Laws of Life and the Influence of Potent Substances on the Vital Economy." m25-21

**NEW RIFLE CORPS.** Those gentlemen who have associated themselves for the purpose of forming a new Rifle Corps, to be uniformed with domestic cloth, are requested to meet at 8 o'clock, on TUESDAY EVENING, at the room on the first floor of the Assembly Building, entrance on Fayette street.

**A general invitation** is given to young men who are desirous of joining a Rifle Company. m24 21

**The members of the CRYSTAL FOUNTAIN Temperance Society** of Baltimore are requested to meet at Union Hall, corner of Calvert and Baltimore-sts., THIS EVENING, 25th inst. at 7 o'clock. Punctual attendance of the members is requested, as business of importance will be laid before the Society. There will be an address delivered on Temperance. By order of the President, N. SPEAKS President.

**J. H. T. JENKINS, Sec'y.** N. B. As this Society is composed of Odd Fellows only, all contributing members, as also all those who have withdrawn from the "Order," are respectfully invited to attend. m25-11

**TO THE PUBLIC.** Several editorial notices which have recently made their appearance in the Sun, in reference to certain affairs between the members of several fire companies, having led many persons to believe that the members of the Independent Fire Company were the always mentioned in connection with the notices in that paper of riots, where its members happen to be implicated, whether in fault or not, while the names of other Companies are gratuitously withheld, has induced me to make a public statement of the fact in an impartial and independent spirit, that the riot in which that Company have participated, have not occurred from rancor seeking, but have been provoked, by cowardly and uncalled for attacks on them, and that, in ALL cases, they have not only acted together on the defensive, but have, as much as possible, avoided all unpleasant collisions with the members of those Companies, who have always evinced a desire to quarrel and create disturbances, and whose very names are synonymous with backguardism and inoperably associated with the word "Rowdy." m25-11

**HEISLER'S OFFICE, HEAD QUARTERS FOR PRIZES.** Two good prizes, though not large—but straws show which way the wind blows! Comb.
