We drew our inference entirely from the articles which we read in the Pennant, and are happy to learn that they were erroneous. The editor of that print may rest assured that we would not be guilty of intentionally misrepresenting his views, or those of the associations which he advocates; and we are gratified that he acquits us on this score. In his last paper he has a long editorial on this subject, in which he states, that the establishment of the St. Patrick, St. Andrews, St. George and German Societies, is for political purposes; and that they are brought to bear, as combinations, upon elections. We know nothing of the operations of these societies out of the city of phia, and arrived at the latter port three days o'clock, p. m. Baltimore; but here their object has always been understood to be very different; and we are certain that they have never undertaken to act as political bodies. They are composed of men of different political sentiments, who unite for laudable and humane purposes. We stated heretofore, that they assist emigrants who may require aid. butions, as he asked pecuniary aid. To this the editor of the Pennant replies:-"What 'assistance' does the emigrant require, beyond what is granted by our laws, and shared | ing against sin-but that does not exhibit as much | alike by himself and the natives of the country?" | bypocrisy as the newspaper editor who affects to | gomery; Otho Scott, Esq. of Harford; John G. | John Lee and R. But the editor of the Pennant objects, that Germans settle in communities, and perpetuate their language and their prejudices. We think it natural that they should be disposed to settle where they can make themselves understood; and we cannot see cause of alarm in this proceeding. Few come among us with such strong prepossessions in favor of the government and laws of Fatherland, as to be hostile to our institutions—for they would scarcely leave home and all its endearments, and venture upon an unknown and distant scene, if they were not borne down by the hand of oppression. It is generally be so flat. This, gentlemen, has caused the dis- A resolution was offered by Mr. Chapman, to escape from the tyranny of rulers, that men are induced to emigrate.

We should condemn the societies which have been mentioned, were they to be converted into political bodies; but even in that case, we should apprehend no danger to the republic-for they never could co-operate so as to become formidable. They would pull adverse ways; and the influence of one would destroy that of the other.

We act upon broad principles which cannot be shaken by the facts detailed in the Pennant. The misconduct of a few, should not bring the coudemnation of the whole. The editor of the Pennant may be right in his censure of the particular acts to which he refers, and yet the principles we maintain remain unimpaired.
