To persons here who desire to inform their friends at a distance of what is transpiring in the busy world, no belter mode can be selected than to cerd them a copy of the Weekly Clipper.

LABOR IN MARYLAND.

We believe there is little doubt but that numbers of the most blgoted and prejudiced citizens of Maryland with regard to the recent changes in the character of its labor, would acknowledge the certain advantages—present and prospective—of the change, were it not laducements, a sufficiently pressing call to de | signal and so welcome? velop itself to thoroughly, had bitherto remained all but dormant. The laborers in question, stimulated by good prices and a certain and urgent demand for their services, | went from farm to farm to gather the crops by contract, so that on the whole the work has been well done, no crops having "cumbered the ground" and been lest for want of the accedful ability to gather them.

Now we insist that more encouraging facts could not be stated. Remembering that the present is the trial year—that in fear of the excellment, of the draft; in fear, of late, that their freedom would not finally be secured by law, that vast numbers of the blacks have fled the State, or remaining, have been peculiarly utsettled in their purposes and prospects, no you for your noble, high-toned, patriolic pot. case could have occurred to put the wants of the planter to a severer test; and yet, we see that when tried by it, the State has "tided over" the difficulty, until launched on the promising fature, no frouble from like sources will ever occur again.

Ard now what is the next thing to be done by every wall wisher to the Commenwealth? Remembering that the people of Marylandas a whole-sre not responsible for the tremendius changes that have taken place, why should the planters stand still to complain of | country. what was inevitable? Why should they not take occasion like sensible and intelligent mer to note and remember--ibst when South Obrelina initiated this movement to spread slavery over "Mexico and the isles of the sea," by recking to set off to itself and establish a vest Slave Republic, that here in the State of Maryland every one-not a corporal's guard nt least distenting-nad long requiesced in | in all the land. Then, and then only, can we the existing condition of things; had never dreamed teriously of interfering with the "rights of property" in the slave, and that this thing would probably have gone along as to the maimed and thattered ones who fill I upquestioned perhaps to a century, had not | so many of the homes through our land. the movement been entered upo: by the Guli
