There is an know what is doing at home;" a fact, oftentimes striking enough, and particularly so in a case which we shall proceed to give, the illustration being a paragraph from a late number of the Boston Journal, and which is as follows:

"NORTHERE FARMERS EMIGRATING." A gentleman who returned a few days since from the Eastern Shore of Maryland, stopped at a hotel in a small town in that locality, and found thirty-six farmers from | ed's "Emall de Paris:" the Northern States, who were there for h the purpose of purchasing farms. In some cases eighty dollars an acre was paid for farming lands in Maryland and Delaware. This is, we believe, but the advance wave of that tide of emigration which there will . be, not only to Delaware and Maryland, but to Virginia and the other Southern without conveying the slightest meretricious States, when peace shall have been de- itea. clared and the country become open to the | I have no hesitation in recommending it to intelligent, enterprising, and skillful me- the profession and the public. Under their influence, whole regions of country which have hitherto | Perfumers and Ladies' Hair Dressers. been blighted by the curse of slavery, or are now desolated by the ravages of war, will be made to "bud and blossom like the

Now the fact that such an influx of extaken place, demonstrates conclusively enough that the distrust which has been felt ever since the commencement of the war as to the accurity of Maryland from fur- | co ther disturbances, has given way; and that with peace assured, thousands will forthwith be seeking this as a desirable region ; for settlement, who have been deterred from coming hither by uncertainty alone as to what might occur to render the homes they might purchase perfectly secure. And remembering that the experience related in the paragraph quoted is the experience of but one observer, what would the revelation be could we come at all the facts in the case, of the same character! No doubt many hundreds of the same class are at this moment quietly looking about in the State, a con sideration of the most encouraging character to all who desire to see its splendid natural resources properly and speedily developed, for all that is needed is capital and labor,—labor of the kind indicated, to make its home with us, to put us at once in the very front rank of progress in everything that constitutes agricultural

and commercial greatness. CAR'T TAKE CARE OF HIMSELY.-IS & recent speech, ex Governor Wright, of Last Night of L Indiana, said:

"As to the cant about the negro's ability to take care of himself, he had these facts to relate, and he would do se without comment:-In 1862 the robel Legislature of South Carolina raised a committee to inquire into the expediency of edutaving the 5400 free negroes of Charleston That committee reperted against it, and stated that those 5000 free negrees paid into the treasury of Charleston anonally \$27,000, and that their property amounted to \$1,500,000; out of that amount of property \$300,000 worth of it was composed of slaves; that the 9000 nee negroes of New Orleans in 1860 were worth as much per capita as the white people of Louisians; that these free negroes had their own schools, their own benevolent societies, &c. These facts, he contended, proved that the free negro was capable of taking care of himself. He' also stated that a lady who owned 500 negroes in 1900 told him that she had lost them all but 200 by the beginning of 1964. That year she made a contract with them to cultivate her farm on the shares, and that last year, under such .. vatem, where

the negro was working for Limself as well, as his mistress, the 200 made her more money than 500 had done in slavery.
