

SEWING MACHINES.

THE AMERICAN INVENTOR'S GREAT TRUMPH.
THE SEWING MACHINE PERFECTION.
All the secret of success lies in the
construction of the **Florence**. It makes four
different stitches with the same ease, and
with as little trouble as the reversible feed motion—a
uniform self-regulating tension of thread
and spring, cog-wheels, or cams, set
out of gear.

It does all kinds of Family Sewing, from
the simple mending of clothes to the
making of garments, using all kinds of Silk, Cotton and
Linen Thread, from No. 30 to No. 100. It can
sew leather, leatherette, silk, satin, &c., as
well as the finest flannel. It makes
seams, buttonholes, and the reversible feed motion—
a uniform self-regulating tension of thread
and spring, cog-wheels, or cams, set
out of gear.

The daily increasing demand renders it prob-
able that this Loan will be exhausted in a few
weeks.

SKINNING MACHINES.

On all sides we hear the merits of the
GROVER & BAKER'S
Celebrated Sewing Machines.
The ladies declare it the best
invented, and the men who have
seen it bound to confess our contention of
the truth of the declaration. What other
machines can do, it does, and does it
elegantly, hem so prettily, quilt so evenly,
sew so accurately, gather so regularly, work
so easily? None, we contend.

Call and see its operations, whether you
wishes to purchase or not. We will
show you the cost, with price list, sent by
mail.

THE PATENT NEOTERIC SMOKING
TUBES are now in the Market. They com-
bine purity with the convenience of smoking.
They are made of a material which is
so thin, they no more space
is required than a common cigar holder, yet by an in-
genious contrivance, are made to hold
an entire cigarette without relighting.
They are unquestionably superior to any-
thing else ever invented, and will
put all deleterious influences and often
deadly effects of smoking to flight.
