DETERMINATION OF ELIGIBILITY FORM

Property Name: Eastern Shore Railroad-Crisfield Branch
Inventory Number: S-517

Address: __________________________ City: __________________________ Zip Code: __________________________

County: Somerset USGS Topographic Map: Princess Ann, Kingston, Marion, Crisfield

Owner: Maryland Transit Administration

Is the property being evaluated a district? no

Tax Parcel Number: N/A Tax Map Number: __________________________ Tax Account ID Number: __________________________

Project: __________________________ Agency: __________________________

Site visit by MHT Staff: no yes Name: __________________________ Date: __________________________

Is the property located within a historic district? yes no

If the property is within a district

District Inventory Number: S-127

NR-listed district X yes Eligible district yes District Name: Crisfield Historic District

Preparer’s Recommendation: Contributing resource yes X no Non-contributing but eligible in another context ___

If the property is not within a district (or the property is a district)

Preparer’s Recommendation: Eligible yes X no

Criteria: ___A___ B___ C___ D___ Considerations: ___A___ B___ C___ D___ E___ F___ G___ None

Documentation on the property/district is presented in:

Description of Property and Eligibility Determination: (Use continuation sheet if necessary and attach map and photo)

A physical description of the Eastern Shore Railroad-Crisfield Branch may be found under item 7 on the Maryland Inventory of Historic Properties form; the significance of the resource is evaluated under Item 8.

The former Eastern Shore Railroad-Crisfield Branch is not eligible for listing in the National Register. Although the Eastern Shore Railroad-Crisfield Branch played a significant role in the economic and social development of the Delmarva Peninsula communities through which it traveled, little physical evidence remains to reflect the corridor’s intended use and significance. A substantial amount of railroad track was previously removed. Surviving track is severely deteriorated and often obscured by vegetated growth. A significant portion of the former railroad corridor is now distinguished by the presence of mature trees. In Crisfield, the track was removed subsequent to the line’s abandonment;

MARYLAND HISTORICAL TRUST REVIEW

and the former corridor now serves as the center median for Maryland Avenue, State Route 413. With the exception of the Marion passenger and freight stations, none of the line's former stations exist. Signage at road crossing has been dismantled. The superstructure of the bridge crossing over the Big Annemessex River, the corridor's lone bridge crossing has been removed. This determination has been made in accordance with the National Register Bulletin entitled *How to Apply the National Register Criteria for Evaluation* (National Park Service 1988) and the National Register Bulletin entitled *Guidelines for Evaluating and Documenting Rural Historic Landscapes* (National Park Service 1989, revised 1999).

The Eastern Shore Railroad-Crisfield Branch, facilitated the transportation of the rich seafood products of the Chesapeake Bay to the lucrative markets of the northeast enabling Crisfield for a time to become the second largest city in the State of Maryland.

Little historic fabric remains of the former railroad corridor to reflect its intended use and significance. The linear corridor begins below Kings Creek and continues 16.6 miles southwest traversing through primarily rural, agricultural lands of Somerset County. Present day SR 413 substantially follows the former rail corridor. A substantial amount of railroad track was previously removed. Surviving track is severely deteriorated and often obscured by vegetated growth. Significant portions of the former corridor are now distinguished by the presence of mature trees. Upon entering Crisfield, a dual highway Maryland Avenue (State Route 413) follows the old railroad bed to the city wharf; the rail track was formerly centered on the roadbed median. The northernmost section of this median is grass planted; as Maryland Avenue approaches the Crisfield wharf, a concrete median is utilized. While the railroad played a major role in the creation and development of Crisfield, surviving physical evidence of the rail corridor is minimal.

Included among the surviving elements is the line’s sole bridge crossing and a passenger and freight station in Marion. The superstructure of the bridge crossing the Big Annemessex River has been removed; wood abutments, wing walls and piers survive. The Marion Passenger Station is a simply constructed frame building topped by a steeply pitched hip roof and fronted by a brick platform whose existence is made obsolete by the absence of rail track. The former freight station, the larger of the two structures, though modified still reflects its original form and function.

Specific dates: 1866, 1884, 1922

Architect/Builder: Eastern Shore Railroad Company

Construction dates: 1866

Evaluation for:

- X National Register
- Maryland Register
- not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

In 1854, a Coast and Geodetic survey of the Chesapeake Bay discovered a large number of oyster beds in Tangier Sound adjacent to Somers Cove. Recognized the importance of this natural resource John W. Crisfield (1806-1897) an attorney from Princess Anne and two term United States congressman (1847-1849 and 1861-1863) urged construction of a railroad south from Delmar to Kings Crossing and then southwest to Sommers Cove (Hayman: 67-68; Kurtze: 8:2).

The Eastern Shore Railroad Company was organized to construct a line from Delmar southwest to Somers Cove, the only deep water port near Tangier Sound. The initial construction from Delmar, Maryland south to Salisbury, Maryland was completed in 1860. Following the Civil War, construction of the line resumed; the first train arrived at the road’s southern terminus Sommers Cove on November 4, 1866. With the advent of the railroad the products of the Chesapeake Bay could move from the Eastern Shore to the lucrative markets of the northeast. In recognition of the contributions of John Crisfield in bringing the railroad to the city, the town fathers changed the name of the city from Somers Cove to Crisfield (Hayman: 67; Kurtze: 8:2; [http://www.lowrshore.net/towns/crisfield.htm](http://www.lowrshore.net/towns/crisfield.htm)).

Rail stations were established at Kingston, Marion, Hopewell and Crisfield. The rail line’s original terminus was located near present day Mariners Road, the then southernmost point of solid ground in Crisfield; a steamboat wharf and a round house had been erected along the path of the rail corridor. This site is located approximately one mile northeast of present day Crisfield wharf (Hayman: 68; Kurtze 8-3).

As the population of Crisfield increased, so did its land area. Discarded oyster shells were dumped to fill the marsh around the southern edge of town, creating a new, roughly half-mile long peninsula. By 1877, the railroad had been extended to the city dock, the community’s southernmost location (Kurtze 8-3; Lake, 1877).
As Crisfield’s importance in maritime commerce increased, the town boomed with rapid construction of oyster plants, commercial structures and quickly erected housing. The combination of the railroad and the oysters helped fuel the development of secondary industries in the city including steam canneries, barrel makers, and blacksmiths (http://www.livingclassrooms.org/lbo).

Crisfield would become known as the “Seafood Capital of the World”. By 1904, the City of Crisfield was the second largest city in the State of Maryland, a distinction it would briefly hold (http://www.lowrshore.net/towns/crisfield.htm).

Crisfield was not the only beneficiary of the railroad’s presence. In the early 1900s, the community of Marion was famous for being the world’s leader in strawberry production earning the title “Strawberry Capital of the World.” Several hundred ice refrigerated railroad cars, fully loaded with berries left the Marion Station each day during the peak of the season. One could see trucks and wagons loaded with strawberries lined up for over a mile waiting to go through the "auction block" located in the center of town (http://www.trainweb.com/marionstation).

On June 1, 1884, the Eastern Shore Railroad was merged into the New York, Philadelphia and Norfolk (N. Y. P. & N) Railroad. Still operated as a branch railroad, the Crisfield line continued to do brisk business. Although the Pennsylvania Railroad acquired control of the N.Y. P. & N. in 1908, the latter railroad continued to operate under its own organization (Hayman: 71-2).

In 1922, under a long term lease the Pennsylvania Railroad assumed operation of the New York, Philadelphia and Norfolk Railroad, which had proved to be a profitable line. The economic upheaval of the Great Depression coincided with the depletion of the Chesapeake Bay oyster beds as a result of overfishing, bringing a halt to Crisfield’s economic development and an end to the railroad’s prosperous years (Hayman:159; Kurtz: 8-5).

Passenger service was hit hardest. On Apr. 23, 1949, passenger service ended between Kings Creek and Crisfield. The Pennsylvania Railroad became the ill-fated Penn Central in 1968. When Conrail was formed from Penn Central and the other bankrupt northeastern railroads in 1976, the Crisfield Branch was officially abandoned (Baer, http://www.prrths.com/Hagley/PRR_hagley_intro.htm).

Verbal boundary description and justification

This resource encompasses the right-of-way of the former Eastern Shore Railroad-Crisfield Branch. The northern boundary of the railroad begins below Kings Creek at the former juncture of the Eastern Shore Railroad’s Crisfield Branch and Newtown Branch. The rail corridor continues 16.6 miles southwest traversing through primarily rural, agricultural lands of Somerset County, embracing the communities of Westover, Kingston, Marion, and Hopewill prior to continuing down Crisfield’s Main Street to its southern terminus at the Crisfield dock. Present day SR 413 substantially follows the former rail corridor. Remaining sections of track are deteriorated and overgrown; significant portions of the corridor are now distinguished by the presence of mature trees. At grade crossings, the track has either been paved over or removed. Surviving features include the single line track corridor, associated road crossings, and signage, the remnants of a railroad bridge across the Big Annemessex River and the Marion passenger and freight station. Upon entering Crisfield, a dual highway Maryland Avenue (State Route 413), follows the old railroad bed to the city wharf; the rail track was formerly centered on the roadbed median.
